Description

Introductory description

This module provides independent synoptic assessment of the knowledge, skills and behaviours of the apprenticeship standard.

Module aims

The national apprenticeship pathway requires all students to complete an End Point Assessment Module in Year 3. The aim of this module is to provide independent synoptic assessment of the knowledge, skills and behaviours of the apprenticeship standard. The assessment will deliver a valid, reliable and independent judgement that the apprentice has achieved the required standard in order to be awarded the Integrated Degree Apprenticeship for Advanced Clinical Practitioner at Level 7.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be

covered. Actual sessions held may differ.

The specific content will vary depending upon the negotiated focus of the clinical change report.

Work-based and self-directed learning Constructing, writing and referencing a clinical change report.

Learning outcomes

By the end of the module, students should be able to:

- Synthesis of learning in the four pillars of advanced practice from taught modules and clinical practice.
- Ability to articulate and present theory related to the pillars of advanced practice and apply to real life clinical scenarios, experienced by the student.

Indicative reading list

Reading lists can be found in Talis

Subject specific skills

Students will develop the following skills;
Critical thinking
Independent decision-making skills
Problem solving skills
Professional judgement to formulate and act on potential diagnoses

Transferable skills

Students will develop the following transferable skills;
Critical thinking
Independent decision-making skills
Problem solving skills
Professional judgement to formulate and act on potential diagnoses

---
