Description

Introductory description

This module provides students with an overview of current economic and political affairs in the UK and in the Eurozone. You will be exposed to a range of applications and monetary theories. You will gain an understanding of how the European institutions work, in particular, the European Central Bank, and the conduct of monetary policy in the Eurozone. The module also covers labour markets and their implications for monetary policy. You will gain skills and techniques to analyse problems relating to monetary policy using mainly a diagrammatic and intuitive approach.

Feedback on assessment

The Department of Economics is committed to providing high quality and timely feedback to students on their assessed work, to enable them to review and continuously improve their work. We are dedicated to ensuring feedback is returned to students within 20 University working days of their assessment deadline. Feedback for assignments is returned either on a standardised assessment feedback cover sheet which gives information both by tick boxes and by free comments or via free text comments on tabula, together with the annotated assignment. For tests and problem sets, students receive solutions as an important form of feedback and their marked assignment, with a breakdown of marks and comments by question and sub-question. Students are informed how to access their feedback, either by collecting from the Undergraduate Office or via tabula. Module leaders often provide generic feedback for the cohort outlining what was done

well, less well, and what was expected on the assignment and any other common themes. This feedback also includes a cumulative distribution function with summary statistics so students can review their performance in relation to the cohort. This feedback is in addition to the individual-specific feedback on assessment performance.
