Module aims

To equip students with the capacity to effectively communicate, solve problems and be creative and innovative in their work, learning and other daily tasks. Problem-solving skills can improve students' success in the classroom, in their daily lives and, more importantly, in their careers. Thus, the module will establish a valuable foundation-level capability that will help students improve their skills and raise their confidence levels for degree-level study, regardless of their chosen course.

Specific aims of the module include:

1. To promote an understanding of key definitions, concepts and theories in regards to organisational problem-solving.
2. To provide students with a foundational understanding of effective communication in organisations in order to facilitate decision making and problem-solving.

3. To promote an understanding of the key ways a leader can facilitate problem-solving.
4. To encourage recognition and understanding of common pitfalls or challenges in decision making, such as biases and ethical issues.
5. To encourage students to approach problems in a creative and innovative way.
6. To develop skills in solving problems as individuals as well as in a team.
7. To facilitate an understanding of the importance of creativity and innovation to organisations and society.
8. To build students' confidence in applying problem-solving techniques, both as individuals and in teams.
9. To develop related personal skills such as leadership, teamwork and communication.
10. To introduce students to the field of social science, and to familiarise them with asking questions/delivering answers through research in this field.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Lecture topics may include but are not limited to:

General communication

Conflict Negotiation

Being a leader

Motivation (leading others and leading yourself)

Followership

General decision-making

Biases in decision-making

Ethical decision-making

Introduction to creativity and the creative person

Creative problem solving skills

Creativity in teams

Team creativity strategies

Innovation in organisations

Entrepreneurship

Innovation in society

Learning outcomes

By the end of the module, students should be able to:

- Understand the definitions of different problem-solving concepts (e.g., creativity, leadership, negotiation), and recognise instances where these are being used to improve performance.
- Understand key communication concepts.
- Understand the definitions of basic leadership concepts.
- Understand common decision making errors (e.g., biases, unethical decisions).
- Understand the individual creative process.
- Understand the team creative process.
- Understand the role creativity and innovation play in starting businesses, improving

organisational performance, and improving society.

- Identify problems and opportunities that require different problem-solving techniques.
- Generate, evaluate and plan the implementation of ideas.
- Metacognition to recognize when they may fall into common decision making biases.
