## Description

### Introductory description

Students will understand principles underlying financial decision making by corporations. They will develop a solid understanding of financing and investment decisions; options, futures, forwards, warrants and convertibles; valuation techniques for investment appraisals. Some of the fundamental concepts of corporate finance, such as corporate governance and capital structure are also discussed and a global aspect of corporate finance is reviewed under international finance.

### Module aims

Make students critically aware of the key financial decisions taken by firms.

Develop in students a sound understanding of the main theories and models of Corporate Finance.

Make students aware of key empirical tests of those models, and their implications.

Provide students with structured opportunities to practise using the key tools and techniques of Corporate Finance.

Prepare students for advanced undergraduate and postgraduate studies in Finance.
