### Module aims

The main objective of the module is to provide students with the tools to analyse firm financial performance from an equity valuation perspective and to carry out a business valuation building on this analysis. A further objective is to encourage students to use the valuation-based framework to analyse the 'quality' of accounting information and to explore empirical studies concerned with testing the value-relevance of financial statement information.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

1. Accounting and cash flow valuation model.

2. Financial analysts' use of financial statements: practice and evidence.
3. Reformulation of financial statements and value-based ratio analysis.
4. Implementation of accounting valuation models.
5. Accounting quality and the value relevance of accounting information.

## **Learning outcomes**

By the end of the module, students should be able to:

- Understand and apply business valuation models that use accounting numbers.
- Gain an understanding of the importance of ratio analysis to investors and analysts and learn how to apply a value based approach to ratio analysis.
- Develop the ability to prepare a thorough valuation analysis including sensitivity analysis on the key assumptions.
- Understand the factors determining quality of accounting information from an investor perspective and gain a basic understanding of empirical research on value relevance.
- Develop ability to apply and integrate concepts from accounting and finance to the analysis of business plans and company valuation.
