## Description

### Introductory description

The primary goal of this module is to provide students, who have no or limited prior experience of business, with a solid foundation in the essential aspects of accounting and financial management.

[Module web page](#)

### Module aims

The aim is to offer an introduction to the key areas of financial accounting, management accounting and financial management with a focus on issues of particular relevance to managers in bio-technology and bio-process based businesses. The course will also emphasise the role and importance of accounting and financial management within the wider business (and in particular the process, bioprocess and biotechnology business) context.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Typically, the syllabus material includes (but is not limited to):

- Introduction to accounting
- Financial analysis (customers, suppliers and competitors)
- The importance of internal financial information and control
- Further methods in costing (ABC and Customer profitability analysis)
- Cash – the accounting number that really matters!
- Investment appraisal; Budgeting and pricing
- Managing for Shareholder Value
- Accounting and strategy

## Learning outcomes

By the end of the module, students should be able to:

- Understand the role and importance of accounting and financial management within the general business context.
- Identify and evaluate the role of accounting in general business management and in particular situations.
- Know and utilise the terminologies, concepts and methods for accounting and finance.
- Research, synthesise and apply financial knowledge to real and practical examples.
- Use financial techniques appropriately. These include ratio analysis, contribution analysis, costing methods, investment appraisal and introductory valuation techniques.
- Assess financial performance from published accounts
- Communicate findings in appropriate language/terminologies.
- Improve business presentation skills.

## Indicative reading list

Atrill, P. and McLaney, E. (2003) Accounting and Finance for Non-specialists (4rd ed.)

Dyson, J.R. (2004) Accounting for non-accounting students (6th edition)
