

MA117-12 Programming for Scientists

20/21

Department

Warwick Mathematics Institute

Level

Undergraduate Level 1

Module leader

Andrew Hague

Credit value

12

Module duration

10 weeks

Assessment

Multiple

Study location

University of Warwick main campus, Coventry

Description

Introductory description

Aspects of software specification, design, implementation and testing will be introduced in the context of the Java language. The description of basic elements of Java will include data types, expressions, assignment and compound, alternative and repetitive statements. Program structuring and object oriented development will be introduced and illustrated in terms of Java's method, class and interface. This will enable the development of software that reads data in a variety of contexts, performs computations on that data and displays results in text and graphical form. Examples of iterative and recursive algorithms will be given. The importance of Java and Java Virtual Machine in networked computing will be described. The majority of examples will be standard applications but the development of Java Applets to be delivered by web browsers will also be covered.

[Module web page](#)

Module aims

To provide an understanding of the process of scientific software development and an appreciation of the importance of data vetting, sound algorithms and informative presentation of results.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Aspects of software specification, design, implementation and testing will be introduced in the context of the Java language. The description of basic elements of Java will include data types, expressions, assignment and compound, alternative and repetitive statements. Program structuring and object oriented development will be introduced and illustrated in terms of Java's method, class and interface. This will enable the development of software that reads data in a variety of contexts, performs computations on that data and displays results in text and graphical form. Examples of iterative and recursive algorithms will be given. The importance of Java and Java Virtual Machine in networked computing will be described. The majority of examples will be standard applications but the development of Java Applets to be delivered by web browsers will also be covered.

Learning outcomes

By the end of the module, students should be able to:

- To enable the student to become confident in the use of the Java language for scientific programming.

Indicative reading list

Books are not essential for this module as use will be made of on-line tutorial and reference material. An informative, optional text is
H M Deitel & P J Deitel, Java How to Program (2nd or 3rd Ed), Prentice Hall.

Subject specific skills

See learning outcomes

Transferable skills

Students will acquire key reasoning and problem solving skills which will empower them to address new problems with confidence.

Study

Study time

Type	Required
Lectures	10 sessions of 1 hour (8%)
Tutorials	9 sessions of 2 hours (15%)
Private study	92 hours (77%)
Total	120 hours

Private study description

Lab sessions, review lectured material and work on set exercises.

Costs

No further costs have been identified for this module.

Assessment

You do not need to pass all assessment components to pass the module.

Assessment group A2

	Weighting	Study time	Eligible for self-certification
Third Project (programming assignment)	40%		Yes (extension)
Second Project (programming assignment)	35%		Yes (extension)
First Project (programming assignment)	25%		Yes (extension)

Assessment group R

	Weighting	Study time	Eligible for self-certification
Module not suitable for reassessment	100%		No

Feedback on assessment

Marked assignments and exam feedback.

Availability

Post-requisite modules

If you pass this module, you can take:

- CS126-15 Design of Information Structures

Courses

This module is Optional for:

- Year 1 of UBSA-3 Undergraduate Biological Sciences
- Year 1 of USTA-G300 Undergraduate Master of Mathematics,Operational Research,Statistics and Economics
- Year 1 of UPXA-FG33 Undergraduate Mathematics and Physics (BSc MMathPhys)
- Year 1 of UPXA-GF13 Undergraduate Mathematics and Physics (BSc)
- UPXA-FG31 Undergraduate Mathematics and Physics (MMathPhys)
 - Year 1 of GF13 Mathematics and Physics
 - Year 1 of FG31 Mathematics and Physics (MMathPhys)
- USTA-G1G3 Undergraduate Mathematics and Statistics (BSc MMathStat)
 - Year 1 of G1G3 Mathematics and Statistics (BSc MMathStat)
 - Year 2 of G1G3 Mathematics and Statistics (BSc MMathStat)
- USTA-GG14 Undergraduate Mathematics and Statistics (BSc)
 - Year 1 of GG14 Mathematics and Statistics
 - Year 2 of GG14 Mathematics and Statistics
- USTA-Y602 Undergraduate Mathematics,Operational Research,Statistics and Economics
 - Year 1 of Y602 Mathematics,Operational Research,Stats,Economics
 - Year 2 of Y602 Mathematics,Operational Research,Stats,Economics

This module is Option list B for:

- Year 2 of UMAA-G105 Undergraduate Master of Mathematics (with Intercalated Year)
- Year 2 of USTA-G300 Undergraduate Master of Mathematics,Operational Research,Statistics and Economics
- UMAA-G100 Undergraduate Mathematics (BSc)
 - Year 1 of G100 Mathematics
 - Year 2 of G100 Mathematics
- UMAA-G103 Undergraduate Mathematics (MMath)
 - Year 1 of G100 Mathematics
 - Year 1 of G103 Mathematics (MMath)
 - Year 2 of G100 Mathematics
 - Year 2 of G103 Mathematics (MMath)
- UMAA-G106 Undergraduate Mathematics (MMath) with Study in Europe
 - Year 1 of G106 Mathematics (MMath) with Study in Europe
 - Year 2 of G106 Mathematics (MMath) with Study in Europe
- UMAA-G1NC Undergraduate Mathematics and Business Studies
 - Year 1 of G1NC Mathematics and Business Studies
 - Year 2 of G1NC Mathematics and Business Studies
- UMAA-G1N2 Undergraduate Mathematics and Business Studies (with Intercalated Year)
 - Year 1 of G1N2 Mathematics and Business Studies (Intercalated yr)
 - Year 2 of G1N2 Mathematics and Business Studies (Intercalated yr)
- UMAA-GL11 Undergraduate Mathematics and Economics
 - Year 1 of GL11 Mathematics and Economics
 - Year 2 of GL11 Mathematics and Economics

- UECA-GL12 Undergraduate Mathematics and Economics (with Intercalated Year)
 - Year 1 of GL12 Mathematics and Economics (with intercalated year)
 - Year 2 of GL12 Mathematics and Economics (with intercalated year)
- Year 1 of UMAA-GV18 Undergraduate Mathematics and Philosophy with Intercalated Year
- UMAA-G101 Undergraduate Mathematics with Intercalated Year
 - Year 1 of G101 Mathematics with Intercalated Year
 - Year 2 of G101 Mathematics with Intercalated Year
- Year 2 of USTA-Y602 Undergraduate Mathematics, Operational Research, Statistics and Economics
