Description

Introductory description

PH332-15 Sartre and Existentialism

Module aims

To introduce students to a major strand of 20th century philosophy through a study of central works of its main exponent.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

The module will focus on a set of issues central to Sartrean existentialism, using his work *Being and Nothingness* as the main textual basis. Topics normally include:

Sartre's notion of prereflective self-consciousness

Radical freedom, reasons, and value

The idea of bad faith

Conscious emotions

Experiencing others as subjects

Learning outcomes

By the end of the module, students should be able to:

- understand and differentiate views on central issues in Sartrean existentialism, and offer relevant support for and critical responses to those views.
- isolate the important claims within readings, understand the structure of arguments, test views for strengths and weaknesses, make pertinent use of examples, and compare the substance of views consistently.
