Description

Introductory description

PH368-15 Philosophy of Religion

Module aims

The module aims to introduce students to a set of key questions, views and arguments in the philosophy of religion, with a focus on the theistic conception of God and the issues raised by the Western monotheistic religions.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

After introducing students to the theistic conception of God, the module will critically assess classical and recent arguments for and against the existence of God and it will discuss a range of philosophical issues concerning religion. The particular issues may vary from year to year. Some of the following issues will be addressed in any given year: the nature of religious language; the relation between God and moral goodness; whether human freedom and responsibility are compatible with divine predestination and divine foreknowledge; the possibility and significance of

miracles; whether religious claims regarding human disembodiment, resurrection, and immortality can be supported or refuted philosophically; exclusivist, inclusivist and pluralist accounts of doctrinal differences among religions. A sample syllabus is provided below.

1. The theistic conception of God. God, faith, and reason.
2. Ontological arguments for God's existence: St Anselm and Plantinga.
3. Cosmological arguments for God's existence, design and fine-tuning.
4. Pragmatic arguments for God's existence: Pascal, James, Swinburne.
5. Arguments from evil against God's existence.
6. Arguments from divine hiddenness against God's existence.
7. Religion, science, and miracles.
8. God and moral goodness.
9. Many religions: exclusivism, inclusivism, and pluralism.

Learning outcomes

By the end of the module, students should be able to:

- Good knowledge and understanding of relevant ideas and arguments.
- Ability to assess these ideas and arguments in an independent manner.
- Ability to discuss these ideas and arguments with others and improve one's knowledge and understanding of them by means of such discussion.

Indicative reading list

The module will rely on a manual, supplemented by an anthology and/or essays on selected issues. Possible manuals include:
