## Description

### Introductory description

"Money talks...", so they say. But what is money? Does it "make the world go round"? In this module we ask these questions and find out that things aren't as straightforward as they might appear: it turns out that there are a lot of different ways of understanding what money actually is, each of which has large implications for how we think about politics and the world around us. From high finance and global monetary relations all the way to hip hop iconography and student debt, money does indeed talk, and this module finds out about what it's saying. This module is an invitation to think about what money is and how it is governed (and to whose benefit).

[Module web page](#)

### Module aims

To introduce students to the political economy of global finance through an exploration of the politics of money.

To provide students with knowledge of a wide selection of the various theoretical approaches to money and their political implications

To apply theoretical approaches studied to a number of important contemporary and historical case studies in international political economy

To allow students to develop advanced knowledge in a core area of the sub-discipline of international political economy.

To develop students' understanding of interrelationship between economic and political questions in the study of politics as a whole.

## **Outline syllabus**

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Week 1 Introduction: Money and Power
