

# PS215-15 Further Methods in Psychology

**20/21**

**Department**

Psychology

**Level**

Undergraduate Level 2

**Module leader**

James Adelman

**Credit value**

15

**Module duration**

10 weeks

**Assessment**

100% coursework

**Study location**

University of Warwick main campus, Coventry

---

## Description

### Introductory description

An integrated approach to conceptual, design and practical statistical aspects of research methods in Psychology.

[Module web page](#)

### Module aims

The module will consolidate and extend your skills and understanding of issues in research methods that affect you as a producer (doing projects) and consumer (reading journal articles) of research.

Specific aims are:

- to prepare students to carry out psychology projects in their second and third year;
- to meet core training and accreditation requirements in psychology;
- to teach students how to analyse and present data; and
- to familiarise students with issues affecting the soundness of evidence in psychological research.

## Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Review of NHST incl. Power for simple case; Choosing tests and data screening; Counterbalancing, randomization and multi-trial-per-condition experiments; Extensions to >2 levels; Two-factor designs, moderation/interactions, simple effects; Higher-order designs; Correlation, regression, multiple regression; Data quality; extensions of regression; Qualitative Methods; Ethical issues

## Learning outcomes

By the end of the module, students should be able to:

- to explore a data set and systematically test hypotheses about the data
- to evaluate the suitability of data for analyses and understand techniques to attenuate problems of data quality
- to present the results of data analysis clearly and concisely
- to understand methodological issues that affect internal validity
- to understand and discuss basic ethical considerations relating to psychological research
- to perform and report some qualitative analyses

## Indicative reading list

Howell, D. C. (2008). Fundamental statistics for the behavioral sciences (6th ed.). Belmont, CA: Thomson Wadsworth. (or a more recent edition of this text)

Brace, N., Kemp, R., & Snelgar, R. (2006). SPSS for Psychologists. (3rd Edition). New York: Palgrave MacMillan.

Howell, D. C. (2007). Fundamental statistics for the behavioral sciences (6th ed.). Belmont, CA: Thomson Wadsworth.

Pallant, J. (2007). SPSS survival manual. Buckingham: Open University Press.

Tabachnick, B. G., and Fidell, L. S. (2006). Using multivariate statistics (5th Edition). Needham Heights, MA: Allyn & Bacon.

## Subject specific skills

understanding of the principles of psychological research, different methods of research and the principles of qualitative methods.

## Transferable skills

critical analysis, formulation and testing of hypotheses  
written communication skills;

use of SPSS.

---

## Study

### Study time

Type	Required
Lectures	10 sessions of 1 hour (7%)
Seminars	2 sessions of 1 hour (1%)
Practical classes	8 sessions of 1 hour (5%)
Assessment	130 hours (87%)
Total	150 hours

### Private study description

No private study requirements defined for this module.

### Costs

No further costs have been identified for this module.

---

## Assessment

You do not need to pass all assessment components to pass the module.

Students can register for this module without taking any assessment.

### Assessment group A

	Weighting	Study time
Homeworks	10%	30 hours
Online homework worksheets for all lectures supported by practical classes, building towards the Final Test.		
Qualitative assessment	20%	26 hours
Group Work in groups of 4 or 5		
Final Test	70%	74 hours
In the same format as homework worksheets, but to be completed in a 2hr window.		

### Feedback on assessment

Homework feedback will be composed of automated feedback for questions that can be marked automatically and written comments as appropriate for textual answers.

Otherwise, conventional feedback.

---

## Availability

### Pre-requisites

To take this module, you must have passed:

- All of
  - [PS113-12 Statistical Methods in Psychology](#)
  - [PS114-18 Research Methods in Psychology](#)

### Courses

This module is Core for:

- Year 2 of UPSA-C800 Undergraduate Psychology
- Year 2 of UPSA-C804 Undergraduate Psychology with Education Studies
- Year 2 of UPSA-C802 Undergraduate Psychology with Linguistics
