Description

Introductory description

What do the voices of black women domestic workers in South Africa tell us about apartheid? What roles are there for men in the ongoing struggle for gender equality in post-apartheid South Africa? How did Chairman Mao's idea that 'women hold up half the sky' impact on Chinese gender relations after the Communist Party came to power in 1949? Was China's recently rescinded one-child policy an abuse of reproductive rights or an unanticipated way to further gender equality?

Why did both the Indian nationalist movement and the British colonial authorities mobilize the concept of gender equality in the struggle for Indian independence? What do recent demonstrations by women in India, such as SlutWalks and the Pink Chaddhi Campaign, tell us about the prospects for Indian feminism today? Are all contemporary Iranian women passive victims of Islamic fundamentalism, and what did the Revolution in Iran mean for men and masculinities? Does the 'veil' liberate or oppress Muslim women and what does it mean to those who wear it?

These are all questions you'll be exploring on this module, which introduces some of the diverse manifestations of gender around the world in the 20th and 21st centuries.

Module aims

To introduce students to some of the diverse manifestations of gender around the world in the 20th and 21st centuries, using case studies from china, South Africa, India and Iran. Themes of resistance, work, sexuality, reproduction, family and religion are pursued in order to facilitate analytical connections between cases studies. Particular attention is paid to the symbolic importance of gender and the extent to which it is at the centre of religious and political ideologies that have dominated the last 100 years: colonialism; nationalism; socialism; religious fundamentalism.
