## Description

### Introductory description

This module runs in Term 2 and is available for students on a course where it is a listed option and as an Unusual Option to students who have completed the prerequisite modules.

Pre-requisites: ST334 Actuarial Methods. It is recommended to take ST338 in parallel with ST345.

Results from this module may be partly used to determine exemption eligibility in the Institute and Faculty of Actuaries (IFoA) module CM1. (Independent application with the IFoA may be required to receive the exemption.)

[Module web page](#)

### Module aims

To cover the syllabus required for the Institute and Faculty of Actuaries modules concerning financial schemes like pensions and life insurance where payments are contingent on the occurrence or non-occurrence of events such as death.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

- Simple assurance and annuities, and their evaluation
- Net premiums and reserves
- Variable benefits and annuities
- Gross premiums and reserves for fixed and variable benefit contracts
- Annuities and assurances involving two lives
- Multiple state models, including multiple decrements
- Cashflow projection techniques
- Factors affecting mortality; selection and standardisation

## Learning outcomes

By the end of the module, students should be able to:

- Define the actuarial symbols related to assurance and annuity contracts, understand their interrelationships, and perform relevant calculations.
- Understand and use life tables for calculations such as expected values and variances for simple contracts.
- Describe and calculate net and gross premiums and premium reserves for various assurance and annuity contracts.
- Describe and use methods to estimate cashflows for contracts involving two lives or multiple states, including the use of multiple decrement models.
- Describe and use methods for assessing profitability and for pricing contracts.
- Explain heterogeneity in populations, and simple methods to deal with heterogeneity.

# Study

## Study time

Type	Required	Optional
Lectures	30 sessions of 1 hour (20%)	2 sessions of 1 hour
Tutorials	8 sessions of 1 hour (5%)	
Private study	112 hours (75%)	
Total	150 hours	

## Private study description

Weekly revision of lecture notes and materials, wider reading, practice exercises and preparing for class tests and the examination.

## Costs

No further costs have been identified for this module.

---

## Assessment

You do not need to pass all assessment components to pass the module.

### Assessment group D1

	Weighting	Study time
Class test 1	15%	
This class test will take place in lecture in Term 2, Week 5.		
Class test 2	15%	
This class test will take place in lecture in Term 2, Week 10		
Online Examination	70%	
Answer ALL questions.		

~Platforms - Moodle

---

- Online examination: No Answerbook required
- Students may use a calculator
- Graph paper

## Weighting

## Study time

- Cambridge Statistical Tables (blue)

### Assessment group R

#### Weighting

#### Study time

Online Examination - Resit

100%

Answer ALL questions.

~Platforms - Moodle

- 
- Online examination: No Answerbook required
  - Students may use a calculator
  - Graph paper
  - Cambridge Statistical Tables (blue)

### Feedback on assessment

Solutions and cohort level feedback will be provided for the class tests within 4 weeks of the test. Your paper will not be returned as it must be retained for the external examiners but you may make an appointment with the module leader to view your script and receive individual feedback.

Solutions and cohort level feedback will be provided for the examination.

## Courses

This module is Optional for:

- USTA-G300 Undergraduate Master of Mathematics, Operational Research, Statistics and Economics
  - Year 3 of G300 Mathematics, Operational Research, Statistics and Economics
  - Year 3 of G300 Mathematics, Operational Research, Statistics and Economics
  - Year 4 of G300 Mathematics, Operational Research, Statistics and Economics
  - Year 4 of G300 Mathematics, Operational Research, Statistics and Economics
- USTA-G1G3 Undergraduate Mathematics and Statistics (BSc MMathStat)
  - Year 3 of G1G3 Mathematics and Statistics (BSc MMathStat)
  - Year 4 of G1G3 Mathematics and Statistics (BSc MMathStat)

- Year 4 of USTA-G1G4 Undergraduate Mathematics and Statistics (BSc MMathStat) (with Intercalated Year)

This module is Option list A for:

- Year 3 of USTA-G300 Undergraduate Master of Mathematics,Operational Research,Statistics and Economics
- Year 4 of USTA-G301 Undergraduate Master of Mathematics,Operational Research,Statistics and Economics (with Intercalated

This module is Option list B for:

- USTA-Y602 Undergraduate Mathematics,Operational Research,Statistics and Economics
  - Year 3 of Y602 Mathematics,Operational Research,Stats,Economics
  - Year 3 of Y602 Mathematics,Operational Research,Stats,Economics
