

# WM3B2-24 Data Science, Algorithms and Complexity in the Cyber Context

20/21

**Department**

WMG

**Level**

Undergraduate Level 3

**Module leader**

Magda Zajackowska

**Credit value**

24

**Module duration**

30 weeks

**Assessment**

50% coursework, 50% exam

**Study location**

University of Warwick main campus, Coventry

---

## Description

### Introductory description

This module develops the central concepts and skills required to design, implement and analyse algorithms for solving problems. Algorithms are essential in all advanced areas of technical cyber security and related subjects, including artificial intelligence, databases, data science, distributed computing, graphics, networking, operating systems, programming languages and security. An important part of using them well is the ability to select algorithms appropriate to particular purposes and to apply them, recognising the possibility that no suitable algorithm may exist. This facility relies on understanding the range of algorithms that address an important set of well-defined problems, recognising their strengths and weaknesses, and their suitability in particular contexts in combination with complementary data structures. Efficiency is a pervasive theme and a clear understanding of algorithmic complexity is essential if efficient algorithms are to be designed and used.

### Module aims

1 - Critically evaluate the appropriateness of common algorithms, algorithmic strategies and data structures for application in the cyber context.

2 - Critically evaluate the complexity and efficiency of an algorithm.

## **Outline syllabus**

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

The content of this module will be taught from a cyber security perspective.

Basic analysis

Algorithmic strategies

Fundamental data structures and algorithms

Basic automata, computability and complexity

Topics in data science and machine learning

## **Learning outcomes**

By the end of the module, students should be able to:

- 1 - Critically evaluate the appropriateness of common algorithms, algorithmic strategies and data structures for application in the cyber context.
- 2 - Critically evaluate the complexity and efficiency of an algorithm.

## **Indicative reading list**

Cormen, T., Leiserson, C., Rivest, R. and Stein, C., "Introduction to Algorithms", MIT Press (2009)

Flach, Peter, "Machine Learning: The Art and Science of Algorithms that Make Sense of Data", Cambridge University Press (2012)

Grimaldi, Ralph P., "Discrete and Combinatorial Mathematics: An Applied Introduction", 5 Ed, Pearson (2013)

Sedgewick R., Wayne K., "Algorithms", Addison Wesley (2011)

## **Subject specific skills**

1 - Critically evaluate the appropriateness of common algorithms, algorithmic strategies and data structures for application in the cyber context.

2 - Critically evaluate the complexity and efficiency of an algorithm.

## **Transferable skills**

Problem solving

---

## **Study**

## **Study time**

<b>Type</b>	<b>Required</b>
Supervised practical classes	18 sessions of 2 hours (15%)
Private study	69 hours (29%)
Assessment	135 hours (56%)
Total	240 hours

### **Private study description**

Independent activity between workshops, following up on activities initiated in previous workshops or preparing for upcoming workshops.

### **Costs**

No further costs have been identified for this module.

---

### **Assessment**

You do not need to pass all assessment components to pass the module.

#### **Assessment group C1**

	<b>Weighting</b>	<b>Study time</b>
Coursework	50%	
Online Examination	50%	

- Online examination: No Answerbook required

#### **Feedback on assessment**

Written feedback for each assignment  
Verbal feedback during tutorial sessions  
Solutions provided to tutorial questions  
Summative feedback on assignments and exam

[Past exam papers for WM3B2](#)

---

### **Availability**

### **Courses**

This module is Core optional for:

- UWMA-H651 Undergraduate Cyber Security
  - Year 3 of H651 Cyber Security
  - Year 3 of H651 Cyber Security
  - Year 3 of H651 Cyber Security
