Subject specific skills

Participants on the programme will be both enhancing their practical teaching skills and growing their understanding of the underpinning pedagogical rationale for teaching in Higher Education. They will have opportunities to enhance both discipline-specific teaching skills, and more overarching understanding and skills in group teaching, teaching philosophy, reflective practice, assessment and feedback and inclusive teaching and learning.

Transferable skills

As an accredited programme which leads to a nationally-recognised teaching status, participants will develop skills which will equip them for roles in teaching in Higher Education. In addition, the reflective practice and critical thinking built into the programme are transferable skills which would be beneficial in other, non-teaching related careers.
