

# CH3C8-90 MChem Industrial Placement Project

21/22

**Department**

Chemistry

**Level**

Undergraduate Level 3

**Module leader**

Sebastien Perrier

**Credit value**

90

**Module duration**

40 weeks

**Assessment**

80% coursework, 20% exam

**Study location**

Placement in industry

---

## Description

### Introductory description

N/A

[Module web page](#)

### Module aims

Development of interactive skills to gain professional experience in an industrial environment.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

The aims and objectives of the placement will be defined by the industrial and academic supervisors, agreed with the student, and clarified in the first feedback placement coordinator meeting at the start of the academic year (October). These will be designed to be of maximum benefit to the company whilst ensuring that the professional development of the student will encompass as wide a variety of experience as possible in the context of the placement.

## Learning outcomes

By the end of the module, students should be able to:

- Have a profound understanding of original research as carried out in industry.
- Demonstrate understanding of the fundamental scientific principles that underlie the project work.
- Communicate orally the results of original research.
- Have a professional attitude to research work.

## Research element

e.g. essay, dissertation, individual or group research, research skills activity, etc.

## Interdisciplinary

e.g. co taught with another department or with an industry perspective, bridges two or more disciplinary concepts, ideas, etc.

## Subject specific skills

Written communication

Organisation and time management

Commercial/organisational awareness

Professionalism

## Transferable skills

Written communication

Organisation and time management

Commercial/organisational awareness

Professionalism

---

## Study

## Study time

Type	Required
Placement	900 hours (100%)
Total	900 hours

## Private study description

No private study requirements defined for this module.

## Costs

No further costs have been identified for this module.

---

## Assessment

You do not need to pass all assessment components to pass the module.

Students can register for this module without taking any assessment.

### Assessment group D

	Weighting	Study time
Industrial Supervisor Assessment	20%	
Oral Presentation	30%	
Written literature review Minimum 5000 words.	30%	
Oral Examination	20%	

### Feedback on assessment

Marks and written feedback for all components released via Moodle.

## Availability

## Courses

This module is Core for:

- UCHA-F110 Undergraduate Master of Chemistry (with Industrial Placement)
  - Year 3 of F110 MChem Chemistry (with Industrial Placement)
  - Year 3 of F112 MChem Chemistry with Medicinal Chemistry with Industrial Placement
- Year 3 of UCHA-4M Undergraduate Master of Chemistry Variants
