Description

Introductory description

This module will explore models, concepts and themes relating to processes of globalisation and schooling. The module will pick up on a number of debates and issues in relating to how attempts have been made to homogenise formal education globally, or at least move towards more universal provision at a number of different levels. This will involve analyses of the political, economic and socio-cultural dimensions of globalisation as it affects education; it goes on and explores the idea of children's global human rights. The module will also examine a number of problems affecting children and their schooling globally. These include poverty and inequality; ill-health and civil war. The module picks up on novel and diverse approaches to these adversities often instigated by children themselves.
