

# ES2D1-15 Manufacturing Engineering Design

**21/22**

**Department**

School of Engineering

**Level**

Undergraduate Level 2

**Module leader**

Helen Neal

**Credit value**

15

**Module duration**

12 weeks

**Assessment**

100% coursework

**Study location**

University of Warwick main campus, Coventry

---

## Description

### Introductory description

ES2D1-15 Manufacturing Engineering Design

[Module web page](#)

### Module aims

This module will develop strategies to identify product requirements, identify design constraints, think creatively, solve problems, identify solutions and foster a holistic approach between design and manufacturing.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

- Manufacturing design strategy
- Manufacturing design criteria

- Creative design practices
- Risk reduction
- Cost reduction through manufacture
- Design review
- Management role

## Learning outcomes

By the end of the module, students should be able to:

- Use computational tools to aid in decision making processes of design and identify which process parameters influence variation in final product characteristics.
- Identify which design features really matter and how to modify a design to give it greater robustness against variation in the manufacturing process.
- Apply risk reduction techniques at the design stages to reduce manufacturing and assembly problems.
- Appreciate and apply the principles of value analysis for design for manufacture (DFM) and design for assembly (DFA) to identify opportunities for cost reduction.
- Apply software simulation and programming tools in the analysis of functional components.
- Function as part of a team and demonstrate understanding of the importance of personal and shared responsibility, teamwork, and communication e.g. by producing professional quality design documentation.

## Indicative reading list

- Product Design for Manufacture and Assembly, 3rd edition 2011, Boothroyd, Dewhurst & Knight, CRC Press
- Shigley's Mechanical Engineering Design, 10th edition 2014, Budynas and Nisbett, McGraw-Hill Higher Education
- Form, structure and Mechanism, M.J.French 2012, Springer
- Engineering Design a systematic approach, Pahl, Beitz, Feldhusen and Grote, 3rd edition 2007, Springer
- Product design, Otto and Wood, 2001, Pearson

[View reading list on Talis Aspire](#)

## Subject specific skills

Plan and manage the design process, including cost drivers, evaluating outcomes, and working with technical uncertainty.

Ability to apply relevant practical and laboratory skills.

## Transferable skills

Communicate (written and oral; to technical and non-technical audiences) and work with others. Overcome difficulties by employing skills, knowledge and understanding in a flexible manner

Exercise initiative and personal responsibility, including time management, which may be as a team member or leader

---

## Study

### Study time

Type	Required
Lectures	5 sessions of 1 hour (3%)
Seminars	10 sessions of 2 hours (13%)
Practical classes	5 sessions of 1 hour (3%)
Supervised practical classes	4 sessions of 4 hours (11%)
Private study	104 hours (69%)
Total	150 hours

### Private study description

#### 104 hrs Guided independent learning

### Costs

No further costs have been identified for this module.

---

## Assessment

You must pass all assessment components to pass the module.

### Assessment group A2

#### Weighting Study time Eligible for self-certification

##### Assessment component

Group Design Report/Prototype (50 pages) 50%	No
Essay	

##### Reassessment component

Individual Assignment	No
-----------------------	----

## Weighting Study time Eligible for self-certification

### Assessment component

Design Application Poster Poster	20%	No
-------------------------------------	-----	----

Reassessment component is the same

### Assessment component

Individual Design Proposal (4 pages) Essay	30%	No
---	-----	----

Reassessment component is the same

## Feedback on assessment

Written feedback on group design reports.  
In session feedback of developing design.  
Group feedback on performance tests.

---

## Availability

### Courses

This module is Core for:

- Year 2 of UESA-H335 BEng Automotive Engineering
- Year 2 of UESA-HH75 BEng Manufacturing and Mechanical Engineering
- Year 2 of UESA-H336 MEng Automotive Engineering
- Year 2 of UESA-HH76 MEng Manufacturing and Mechanical Engineering

This module is Option list A for:

- Year 2 of UESA-H113 BEng Engineering
- Year 2 of UESA-HN15 BEng Engineering Business Management
- Year 2 of UESA-H112 BSc Engineering
- Year 2 of UESA-HN11 BSc Engineering and Business Studies
- Year 2 of UESA-H114 MEng Engineering
