Warwick Foundation Studies

Level

Foundation

Module leader

Johannes de Kam

Credit value

30

Module duration

24 weeks

Assessment

100% coursework

Study location

University of Warwick main campus, Coventry

Description

Introductory description

The IRS for Business module aims to ensure that students develop the necessary competencies and skills to succeed in Business, Finance and related courses. It will provide bespoke skills training and support for students aiming to progress to an undergraduate degree in the United Kingdom. It will provide training in reflective and critical thinking, team-working, and raising the awareness of self to develop greater ability in learners to engage with academic debate and take responsibility to critically inquire and evaluate issues in Business and Finance. The module aims to ensure that students become independent learners and researchers who are equipped to think for themselves.

[Module web page](#)

Module aims

1. To develop students (inter)independent learning skills and confidence through inquiry based learning into current issues that affect businesses
2. Introduce students to, and raise their understanding of, academic research within business related fields- including the language and methods used.

3. To develop students' transferable research skills that will help them become more effective learners in their undergraduate studies

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

1. What is research? Learning about what research is and the information literacy skills that support research including asking relevant questions, evaluating sources, document analysis, formulating search strategies, effective searching, reflection and developing coherent lines of argument.
2. Introduction to Problem Based learning – taking part in group based tasks in which students utilise, develop and practise research skills whilst investigating interdisciplinary issues in Business and Finance.
3. Research Project – students will be taught about different research methods, including quantitative and qualitative methods used, research ethics, question design and analysis. They will propose, design, plan and carry out their own research study leading to a presentation in which they will answer questions about their research.

Learning outcomes

By the end of the module, students should be able to:

- Utilise inquiry skills to investigate and analyse a range of issues facing global businesses today
- Effectively reflect and critically consider their approach their academic study and group learning
- Demonstrate a range of transferable skills including project planning, data analysis and relevant digital literacy skills as applicable to research in business related fields
- Analyse and evaluate research undertaken by others within the field, drawing comparisons with research done in Business related fields

Research element

Research project

Interdisciplinary

Students undertake study of different problem based learning tasks from an interdisciplinary basis.

International

Students are to be assessed on contribution of research globally in the subject area.

Subject specific skills

- Information literacy skills - library skills, effective internet searching, use of databases.
- Inquiry Skills - asking questions, seeking and analysing different answers, coming to your own conclusion
- Group work skills
- Independent learning skills - planning, time management
- Research skills - e.g. how to undertake questionnaires, interviews
- Reflective thinking/ writing
- Critical thinking

Transferable skills

- Information literacy skills - library skills, effective internet searching, use of databases.
- Inquiry Skills - asking questions, seeking and analysing different answers, coming to your own conclusion
- Group work skills
- Independent learning skills - planning, time management
- Research skills - e.g. how to undertake questionnaires, interviews
- Reflective thinking/ writing
- Critical thinking

Study

Study time

Type	Required
Seminars	72 sessions of 1 hour (25%)
Online learning (independent)	6 sessions of 45 minutes (1%)
Private study	123 hours 30 minutes (42%)
Total	290 hours

Type	Required
Assessment	90 hours (31%)
Total	290 hours

Private study description

Reading, practising of ideas taught in class. Preparation for seminars.

Costs

No further costs have been identified for this module.

Assessment

You do not need to pass all assessment components to pass the module.

Assessment group A2

	Weighting	Study time
Foundations of Research - online learning Selection of information literacy moodle modules and research ethics module.	10%	10 hours
Teamwork Reflection Reflective writing or Vlog on teamwork.	20%	20 hours
Logbook Planning and preparation for Research Project	30%	20 hours
Business Research Project Presentation of Research Project to include both an academic poster AND discussion of the research.	40%	40 hours

Feedback on assessment

Written comments via tabula; tutorials for students who wish to have further guidance
