Description

Introductory description

The study of Consumer Behaviour is fundamental to the discipline of Marketing.

Understanding consumer behaviour is essential for marketers as it helps them understand why individuals act in certain ways, identify what individuals want (products, services, attributes, associations), how they want to be spoken to (communicate/learn) and influence behaviour in certain situations. An understanding of the psychological processes involved in decision-making and the various influences on these processes enable markers to develop effective strategies and managerially useful analyses.

This course enables the students of marketing to examine in greater depth issues raised in the introductory marketing module. This module will provide students with an understanding of the crucial importance of understanding the psychology of consumers for company success. Students will be able to critically examine critical issues in consumer behaviour and apply the theories and principles of consumer behaviour in a practical context.
