

PO92Q-20 Advanced Quantitative Research

21/22

Department

Politics & International Studies

Level

Taught Postgraduate Level

Module leader

Philippe Blanchard

Credit value

20

Module duration

9 weeks

Assessment

100% coursework

Study location

University of Warwick main campus, Coventry

Description

Introductory description

QS903-20

[Module web page](#)

Module aims

This module introduces students to a selected set of advanced statistical methods that are commonly used in quantitative social research. A further aim is to familiarise students with the key issues in the craft of applied work so that they become careful, considered and thoughtful researchers in quantitative social sciences.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Week 1: Introduction to the module, data and software

Weeks 2-3: Topic 1

Weeks 4-5: Topic 2

Week 6: Reading Week

Weeks 7-8: Topic 3

Weeks 9-10: Revision and Data Analysis Workshops

The three topics offered might vary from year to year, depending on staff availability and student demand. The methods covered will be announced in advance, and they are likely to be drawn from the following list:

Categorical data analysis (e.g. loglinear analysis)

Causal inferences with observational, experimental and quasi-experimental data

Event history analysis

Qualitative Comparative Analysis

Correspondence Analysis

Latent Class Analysis

Multilevel analysis

Panel data analysis

Social network analysis

Bayesian Analysis

Agent Based Simulation

Spatial Analysis

Learning outcomes

By the end of the module, students should be able to:

- understand and appreciate forms of statistical analysis and advanced quantitative approaches
- have an awareness of the value of, and practical experience of applying advanced quantitative analysis techniques
- have a heightened awareness of both the technical and theoretical/conceptual dimensions of quantitative data analysis
- carry out a range of advanced statistical analyses using statistical computing software
- manipulate and to analyse secondary survey data using statistical computing software, and to present and interpret the results of these analyses appropriately at an advanced level
- carry out advanced statistical analyses using statistical software

Subject specific skills

Key Skills; Subject-Specific/Professional Skills

- carry out a range of advanced statistical analyses using statistical computing software
- manipulate and to analyse secondary survey data using statistical computing software, and to present and interpret the results of these analyses appropriately at an advanced level
- carry out advanced statistical analyses using statistical software
- provide in-depth interpretation about advanced quantitative analysis
critique and critically engage published quantitative research

Transferable skills

Cognitive Skills

- have a heightened awareness of both the technical and theoretical/conceptual dimensions of quantitative data analysis

Study

Study time

Type	Required
Lectures	9 sessions of 1 hour (4%)
Practical classes	9 sessions of 2 hours (9%)
Private study	173 hours (86%)
Total	200 hours

Private study description

tbc

Costs

No further costs have been identified for this module.

Assessment

You must pass all assessment components to pass the module.

Assessment group A

	Weighting	Study time
Technical Report	100%	
One 4,000-word technical report.		
Note that word count for quantitative methods modules (coded "P...Q") follows a specific rule: illustrations count for 400 words per equivalent page.		

Feedback on assessment

Detailed and regular feedback will be provided throughout the module.

FORMATIVE

Verbal feedback on lab work will be provided at relevant points in the lectures and workshops throughout all sessions. This will be provided by module teachers at each session. In addition, student participation is encouraged and this includes students giving each other peer feedback during classes on their own work as well.

SUMMATIVE

Detailed written feedback will be provided on summative assessments. This will be provided by tutors marking individual student work and commenting on issues and errors throughout their assignments.

Availability

Courses

This module is Core for:

- TIMS-L990 Postgraduate Big Data and Digital Futures
 - Year 1 of L990 Big Data and Digital Futures
 - Year 2 of L990 Big Data and Digital Futures
- Year 1 of TPOS-M9Q1 Postgraduate Politics, Big Data and Quantitative Methods

This module is Core optional for:

- Year 1 of TPOS-M9PV Double MA in Journalism, Politics and International Studies (with Monash University)

This module is Optional for:

- Year 1 of TPOS-M9PT MA in International Development
- Year 1 of TPOS-M1PA MA in International Politics and Europe
- Year 1 of TIMA-L99A Postgraduate Taught Digital Media and Culture
- Year 1 of TPOS-M1P3 Postgraduate Taught International Political Economy

- Year 1 of TPOS-M1P8 Postgraduate Taught International Politics and East Asia
- Year 1 of TPOS-M9P9 Postgraduate Taught International Relations
- Year 1 of TPOS-M9PC Postgraduate Taught International Security
- Year 1 of TPOS-M9PS Postgraduate Taught Political and Legal Theory
- Year 1 of TPOS-M9PF Postgraduate Taught Public Policy
- Year 1 of TPOS-M9PQ Postgraduate Taught United States Foreign Policy
- Year 1 of TIMA-L99D Postgraduate Taught Urban Analytics and Visualisation
