Module aims

Previous knowledge of psychology will not be assumed. The module covers 4 key areas of psychology, developing basic knowledge in each. Taken together, PS111 Brain and Behaviour and PS112 Psychology in Context provide a general introduction to Psychology designed to support work in the second and third years of the Psychology Honours Degrees.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

The class covers four different subjects that represent a sample of research and theoretical topics in psychology.: 1) History of Psychology; 2) Developmental Psychology, 3) Social Psychology, and

4) Psychology of Ageing and Memory.

Psychology in Context is part of a general introduction to Psychology designed as a foundation for further learning in second and third years of the Psychology Honours Degrees.

Learning outcomes

By the end of the module, students should be able to:

- be familiar with and able to discuss some of the classic studies in the areas of psychology set out above;
- have a critical appreciation of some of the main concepts and theories in each of the areas;
- locate modern psychology in a wider intellectual and historical context;
- understand the parts played by developmental psychology and the study of memory in psychology as a whole; and
- be able to take a historical perspective on psychology as a science.
