Description

Introductory description

A basic finance module covering fundamental concepts for eBM students.

The prime way every business is judged is via its financial statements, which encompass both financial and non financial performance measures. Business students need to be able to predict the effect their actions as an employee/director will have on those financial statements.

Likewise all businesses sell and all businesses buy. Understanding the costs of delivery are fundamental to business success.

This module will cover the basics of accounting and external reporting, forecasting and the costing of goods and services.

Module aims

The prime way every business is judged is via its financial statements, which encompass both financial and non financial performance measures. Business students need to be able to predict the effect their actions as an employee/director will have on those financial statements.

Likewise all businesses sell and all businesses buy. Understanding the costs of delivery are fundamental to business success

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

This module looks at the interplay between a business' operations and its financial performance, with particular emphasis on costing for both goods and services.

Learning outcomes

By the end of the module, students should be able to:

- Critically assess and defend the calculation of the costs of production of goods/delivery of services, and budgets/projections associated to those costs.
- Critically evaluate the relationship between operational performance of an organisation and the financial measures of the organisation.
