Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be

covered. Actual sessions held may differ.

The Secondary PGCE Subject Studies module has been developed to support the professional practice of students, as undertaken in their school setting, as they work towards meeting the Teachers' Standards. It is designed to heighten students' awareness of the pedagogy of their subject area and enable them to adopt a range of approaches and strategies to ensure that their teaching is sufficiently diverse to challenge or support as appropriate. It is also designed to ensure that students have a broad understanding of issues in their subject(s), beyond those they may encounter in their school setting. This will enable them to combine theory with practice and systematically evaluate and reflect on action taken, thus ensuring that students (trainee teachers) emerge from their PGCE as effective, competent and professionally aware educators in their subject area.

Learning outcomes

By the end of the module, students should be able to:
