

EQ208-15 Philosophy in Education

22/23

Department

Education Studies

Level

Undergraduate Level 2

Module leader

Emma Williams

Credit value

15

Module duration

10 weeks

Assessment

100% coursework

Study location

University of Warwick main campus, Coventry

Description

Introductory description

This module will develop your knowledge of the subject of philosophy and extend your understanding of philosophy's role within education. You will examine different accounts of the methods and purposes of philosophy, and engage with different traditions of thought, in a way that will enable you to think critically and reflectively about the educational value of philosophy. The module is interdisciplinary, and it includes both theoretical and practical components. It explores the way an understanding of philosophical debates can help address problems in education, teaching and learning. You will also have the opportunity to design, run and reflect on your own practical teaching activity on this module. This will enable you to develop teaching skills, and skills in communicating philosophical ideas to non-specialist and wider audiences.

[Module web page](#)

Module aims

1. To critically investigate different methods of enquiry used in philosophy and different traditions of philosophical thinking.
2. To critically analyse contemporary approaches to philosophy in schools and consider alternatives.
3. To explore how practical issues and experience in education can shed new light on philosophical concepts and debates.

4. To examine how an understanding of philosophical assumptions about thinking, learning and teaching can assist in teaching subjects
5. To examine how an understanding of the philosophical assumptions behind school curricula can assist and enhance pupil learning.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

1. The relationship between education and philosophy
2. The nature of philosophical thinking
3. Philosophical methods
4. 'Analytic' and 'continental' approaches to philosophy
5. The role of experience, imagination and creativity in philosophy
6. Philosophy's relationship to art and literature
7. Philosophy in schools and the educational value of philosophy

Learning outcomes

By the end of the module, students should be able to:

- Critically understand a variety of approaches to philosophy and philosophical thinking, including knowledge of their underlying assumptions
- Effectively communicate philosophical ideas to specialist and non-specialist audiences, using established disciplinary techniques.
- Use established methods and techniques proficiently, to review and consolidate literature, formulate arguments, and create examples and illustrations.
- Apply theoretical and conceptual arguments to practical educational problems and issues in a competent manner
- Demonstrate skills and competence in applying practical issues and experience to the critique of theoretical and conceptual arguments.

Interdisciplinary

This module applies historical and contemporary debates in the field of philosophy to the solution of educational problems and issues. It also explores how thinking about education and its nature and purpose can shed new light on traditions and debates within philosophy.

Subject specific skills

Students should demonstrate a critical understanding of -

- the underlying values, theories and concepts relevant to education
- the diversity of learners and the complexities of the education process
- the complexity of the interaction between learning and local and global contexts, and the extent to which participants (including learners and teachers) can influence the learning process
- the societal and organisational structures and purposes of educational systems, and the possible implications for learners and the learning process
- theories, practice and research in the area of education

Transferable skills

- Active listening
- Cognitive flexibility
- Communication skills
- Complex problem solving
- Coordinating with others
- Creativity

- Critical thinking
 - Interpersonal and communication
 - Personal development skills
 - Persuading/influencing
 - Reasoning
 - Team working
-

Study

Study time

Type	Required	Optional
Lectures	9 sessions of 1 hour (6%)	
Seminars	9 sessions of 2 hours (12%)	
Tutorials	(0%)	1 session of 15 minutes
Practical classes	1 session of 3 hours (2%)	
Private study	120 hours (80%)	
Total	150 hours	

Private study description

Independent study hours include background reading, completing reading/other tasks in preparation for timetabled teaching sessions, undertaking research using the library resources, follow-up reading work, working on individual and group projects, the completion of formative and summative assignments, revision.

Costs

No further costs have been identified for this module.

Assessment

You do not need to pass all assessment components to pass the module.

Assessment group A1

	Weighting	Study time
Reflective Assignment	15%	
A 1,000-word reflective assignment.		
Assessed Essay	85%	

Weighting

Study time

A 2,000-word essay.

Feedback on assessment

Tutorials \r\nPeer feedback on reflective pieces and whole group feedback during seminar
\r\nWritten feedback on all assessed pieces
