

ES99B-15 An Introduction to Global Health

22/23

Department

School of Engineering

Level

Taught Postgraduate Level

Module leader

Olalekan Uthman

Credit value

15

Module duration

2 weeks

Assessment

100% coursework

Study location

University of Warwick main campus, Coventry

Description

Introductory description

This is a five-day intensive module delivered over 2 weeks; including lectures, seminars, and workshops.

[Module web page](#)

Module aims

The module aims to introduce students to key global health issues and enable them to critique and formulate possible solutions.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Online Learning resources (interactive learning materials on the basic principles of Public Health):

- The global burden of disease [Prof Noel McCarthy, WMS]
- The social determinants of health including economic, psychosocial, educational, nutritional, environmental determinants; measures of deprivation; determinants of inequality and the impact of social and political forces [Dr Wolf Markham, WMS]
- What is Evidence-Based Medicine? [Dr Deborah Biggerstaff, WMS]

The module will consist of 5 days sessions for students. The module leader(s) will attend all of each session, to integrate and stimulate the interdisciplinary learning.

The core design is that each day the module leader(s) and subject specialists will choose how they wish to deliver a combination of discipline or application grounded material with activities that will allow the students (with the module leader) to develop their learning in an interdisciplinary style that will help them to explore and deepen their knowledge of that day's theories and set texts/materials.

Teaching will be shared with the MPH course to aid interdisciplinarity. Linkages are identified across the diverse topics covering the three main facets of Public Health: Health protection, Health improvement and Health services in a global context.

(DRAFT PROGRAMME & PRESENTERS):

Day One: Introduction to Global Health

- Introduction to the module, assessments and the Global Health Agenda
- Introducing the United Nations, the World Health Organisation and the Sustainable Development Goals
- An introduction to Ethical principles in global health
- Group work to prepare for group presentations

Day Two: Health Protection

- Summary of previous day and finding the linkages
- Outbreak investigation & notifiable disease surveillance seminar including aspects of outbreak/incident detection, identifying causes, risk communication and control strategies
- Resilience and the health responses in an emergency seminar (examining natural disasters, war, terrorism and pandemics in high, middle and low income settings)
- Group work to prepare for group presentations

Day Three: Healthy Cities

- Summary of previous day and finding the linkages
- Urbanisation and 'slum' health seminar including the sociology and health problems and how to improve the health and welfare of these populations
- City design to improve mental health and wellbeing seminar including
 - The impact of the built environment on health inequalities and mental health
 - The impact of scenic environments on our health and happiness and
 - Global Cities
- Group work to prepare for group presentations

Day Four: Food Security and the Right-to-food

- Summary of previous day and finding the linkages
- Food security seminar including
 - Challenges of global food security providing an understanding of the elements contributing to the food security agenda to provide affordable, safe and nutritious food within a global

perspective

-What is Agri-health and why is it important? [IFSTAL Network]

- The right to food seminar - Identifying the responsibilities of states regarding the right to food and global barriers impacting on those who want to feed themselves as well as the global progress of legislating the right to food
- Poster workshop
- Group work to prepare for group presentations
Day Five: Gender Equality and Health Services
- Summary of previous day and finding the linkages
- Universal coverage and accessibility to health services
- Gender equality
- The magnitude and economic and health-related consequences of medical tourism
- GROUP PRESENTATIONS + PEER FEEDBACK
Virtual Poster Exhibition
- SUBMIT VIRTUALLY AND ENGAGEMENT WITH DISCUSSION FORUM ONLINE TO
POSE AND ANSWER QUESTIONS

Learning outcomes

By the end of the module, students should be able to:

- 1. Demonstrate comprehensive understanding of the global burden of disease and social determinants of health.
- 2. Identify key global health challenges relating to Health protection, Health improvement and Health services.
- 3. Critique existing policy and practice and formulate creative and practical solutions to global health issues.
- 4. Conduct a health impact assessment.
- 5. Develop their communication skills by delivering a presentation and developing a scientific conference style poster.
- 6. Work effectively in teams and across disciplines.
- 7. Develop research skills of evidence synthesis and critical appraisal.

Indicative reading list

Illustrative Bibliography (Guidance only as most current evidence will be used as essential reading)

Research element

Develop research skills of evidence synthesis and critical appraisal.

Interdisciplinary

The module adopts an interdisciplinary teaching approach. Students from a wide variety of disciplinary and professional backgrounds will attend this module, enabling them to explore topics from a range of different perspectives.

International

The module covers global health matters and covers the role of the United Nations and the World Health Organisation and introduces students to the Sustainable Development Goals. In addition, the module covers issues of international concern such as pandemics, slum health and the impact of global food security on the provision of affordable, safe and nutritious food.

Subject specific skills

1. Formulate creative and practical solutions to global health issues.
2. Conduct a health impact assessment.

Transferable skills

1. Apply problem solving skills, information retrieval, and the effective use of general IT facilities
 2. Communicate (written and oral; to technical and non-technical audiences) and work with others
 3. Exercise initiative and personal responsibility, including time management, which may be as a team member or leader
 4. Awareness of the nature of business and enterprise in the creation of economic and social value
 5. Overcome difficulties by employing skills, knowledge and understanding in a flexible manner
 6. Ability to formulate and operate within appropriate codes of conduct, when faced with an ethical issue
 7. Appreciation of the global dimensions of engineering, commerce and communication
 8. Be professional in their outlook, be capable of team working, be effective communicators, and be able to exercise responsibility and sound management approaches.
-

Study

Study time

Type	Required
Seminars	30 sessions of 1 hour (20%)
Private study	10 hours (7%)
Assessment	110 hours (73%)
Total	150 hours

Private study description

Pre-module preparation and reading.

Costs

No further costs have been identified for this module.

Assessment

You must pass all assessment components to pass the module.

Assessment group A

	Weighting	Study time	Eligible for self-certification
Group Oral Presentation	20%	22 hours	No
Moodle Quiz	20%	22 hours	No
Moodle-based quiz			
Individual Poster Presentation	60%	66 hours	No

Feedback on assessment

Written feedback with the availability of face-to face personalised feedback.

Availability

Courses

This module is Core for:

- TESA-H1C1 Postgraduate Taught in Humanitarian Engineering
 - Year 1 of H1C1 Humanitarian Engineering
 - Year 1 of H1C3 Humanitarian Engineering (with Management)
 - Year 1 of H1C2 Humanitarian Engineering (with Sustainability)
 - Year 2 of H1C1 Humanitarian Engineering
 - Year 2 of H1C3 Humanitarian Engineering (with Management)
