Module aims

The module aims to provide a sound basis in the fundamentals of economic concepts and principles and their application to real world situations. Students will develop analytical skills using economic models and diagrammatical tools provided during the lectures. Students will learn how to apply these economic models to real world scenarios and how to construct sound arguments that underpin critical essay writing.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Unit 1: Microeconomics

- The Economic Problem

- o The nature and purpose of economic activity
- o Introduction to microeconomics versus macroeconomics
- o Economic resources
- Scarcity and resource allocation;
 - o Scarcity, choice and the allocation of resources
 - o Production possibility diagrams
 - o Value judgements, positive and normative statements
 - o Supply and demand
 - o Analysing equilibrium in markets
 - o The price mechanism
 - o Changes in market conditions
 - o The efficient allocation of resources
- Elasticity
 - o Price elasticity of demand
 - o Income elasticity of demand
 - o Cross-price elasticity of demand
 - o Price elasticity of supply
- Consumer choice;
 - o Utility theory
 - o Consumer surplus
 - o Efficiency
- Producer theory
 - o Cost curves
 - o Revenue
 - o Profit
 - o Time period
- Profit maximisation under alternative market structures;
 - o Perfect Competition – short run and long run
 - o Oligopoly – competitive and collusive oligopolies
 - o Monopoly - sources of monopoly power, price discrimination
- Behavioural economics;
 - o The Objectives of Firms
 - o The Divorce of Ownership and Control
 - o Strategic thinking and game theory
- Economics of market failure;
 - o The meaning of market failure
 - o Positive and negative externalities in consumption and production
 - o Merit and demerit goods
 - o Public goods
 - o Monopoly and the allocation of resources

Unit 2: Macroeconomics

- Economic schools of thought;
 - o Modelling the determination of national income;
 - o Main Macroeconomic Targets (low inflation, full employment, economic growth and a healthy balance of payments)

- o The Role of the Government and Economic Policy
- Macroeconomic indicators (GDP, CPI, RPI, unemployment)
 - o Income, output, and expenditure identity
 - o Circular flow model
- The Long-run vs the Short-Run
- Economic Growth – causes and consequences
- The Business Cycle
- Employment and Unemployment (causes and costs)
- Inflation and Deflation (Causes and costs)
- International trade and competitiveness
 - o The exchange rate
 - o Trade and the Balance of Payments
- The goods and the money market;
 - Aggregate demand – consumption, investment, government spending, net exports
 - Demand and supply of money
 - Interest rates and the transmission mechanism
 - Aggregate supply – short run and long run
- Economic Policy
 - o Fiscal Policy
 - o Monetary Policy
 - o Supply side policy

Learning outcomes

By the end of the module, students should be able to:

- a) Present a range of economic models and theories used to explain economic behaviour, showing understanding of the assumptions and limitations of economic models.
- b) Demonstrate strong knowledge of core micro and macro-economic concepts with an awareness of debates and developments in the subject;
- c) Analyse microeconomic models addressing consumer and producer behaviour and their application to key economic problems.
- d) Exhibit understanding of macroeconomic models, their role in explaining government policy and their application to some of the big questions the world is facing;
- e) Demonstrate the ability to apply economic theory to real world examples through individual research.
- f) Show understanding of the links between economics and other subjects, including politics, business and mathematics.

Indicative reading list

Sloman, J., Garratt, D., (2016) Essentials of Economics, 7th edn., Harlow, Pearson

Gillespie, A., (2016) Foundations of Economics, 4th edn., New York, Oxford University Press

Research element

Students are required to choose a country to research in Summative assessments 3 and 4. Students will research examples of the application of theory to real world situations and evaluate the outcomes.

In summative assessment 3 students will examine examples of market failure that have resulted in government failure.

In summative assessment 4 (final exam) students will research the factors affecting the success of investment for economic growth.

In both cases the research element forms 40-45% of the assessment mark.

International

Students are encouraged to bring the experience of their home country to the course.

Students are required to research a country of their choice for both the coursework essay and the final examination assessment, giving them the opportunity to evaluate how governments in other countries respond to problems in individual markets and in the macroeconomy.

Subject specific skills

.Analysis and interpretation of economic data

Use of diagrammatic and mathematical models to explain economic theory

Application of economic theories to real world contexts through individual research.

Analysis and evaluation of the impact of macroeconomic policies on the achievement of macroeconomic objectives.

Transferable skills

Use of mathematics and diagrammatical analysis

Use of analytical and critical thinking skills

Use and interpretation of data.

Study

Study time

Type	Required
Lectures	25 sessions of 1 hour (10%)
Seminars	75 sessions of 1 hour (29%)
External visits	1 session of 1 hour (0%)
Online learning (scheduled sessions)	(0%)
Online learning (independent)	50 sessions of 1 hour (19%)
Private study	108 hours (42%)
Total	259 hours

Private study description

50 hours on online independent learning to engage with the required readings for each week, recorded short, topic lectures and other online resources.
89 hours of private study to consolidate learning.

Costs

No further costs have been identified for this module.

Assessment

You must pass all assessment components to pass the module.

Assessment group A2

	Weighting	Study time
Moodle Multiple Choice Quiz	10%	6 hours
Set Exercises	15%	9 hours
One hour test (50 marks) downloaded from Moodle and uploaded to Tabula. Short answer questions requiring the application of theory to contexts that involve analysis or evaluation.		
Essay (1500 words)	25%	15 hours
Written Report (2000 words)	50%	30 hours

Feedback on assessment

Tabula general and individual feedback; one to one feedback by appointment
