Description

Introductory description

This is an elective module available for WBS and non-WBS students.

Due to digitalization of the economy the role of information technology and information systems in business organisations is changing rapidly. Students will learn to think strategically about information systems and how to avoid the worst pitfalls of organisational information technology and systems. This entails 1) understanding what does strategy and competitive advantage mean, 2) learning to identify the competitive potential of information technologies in different contexts, and 3) recognising key management issues to be addressed in organisational information technology and systems with respect to business strategy. The module explores these three dimensions with respect to several key information technology and systems management topics.

Module aims

Due to digitalization of the economy the role of information technology and information systems in business organisations is changing rapidly. Students will learn to think strategically about information systems and how to avoid the worst pitfalls of organisational information technology

and systems. This entails 1) understanding what does strategy and competitive advantage mean, 2) learning to identify the competitive potential of information technologies in different contexts, and 3) recognising key management issues to be addressed in organisational information technology and systems with respect to business strategy. The module explores these three dimensions with respect to several key information technology and systems management topics.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

The module takes place as one three-hour session per week. The sessions typically consist of a lecture, group work and a plenary in discussing a case study on the weekly topic. The module covers key IS/IT management topic from a strategic perspective such as:

- Strategy and competitive advantage
- Knowledge and information asset management
- Sourcing and cloud computing
- Information security and privacy
- Digital platforms and ecosystems
- The execution of IT projects
- Current hot topics (e.g. sharing economy, business analytics and future technologies)

Learning outcomes

By the end of the module, students should be able to:

- An understanding of the role of information and information systems in business organisations.
- An increased understanding of the role that IT can play in business by applying concepts and frameworks from the course in the context of real business scenarios.
- An insight into the strategic management issues associated with the planning, development and implementation of IT/IS in organisations.
- Analyse various real-life technologies using theories of strategy.
