Description

Introductory description

The dissertation is an opportunity to explore, in depth, an area of academic and/or professional interest related to your degree. Building on the knowledge and skills developed during the Foundation Research Methods module, and your other modules, you will conduct an independent research project, developing a deeper understanding of your chosen topic. From your research project you will produce a dissertation, with guidance from a supervisor who will be allocated to you. Through the dissertation you will demonstrate the ability to analyse and synthesise relevant literature, produce coherent arguments supported by relevant evidence and logical discussion, and acknowledge sources of ideas and information.

Module aims

This module provides students with either:

- an opportunity to consider in depth an area of academic and professional interest related to education. The dissertation demonstrates the ability to analyse and synthesise relevant literature, produce coherent arguments supported by relevant evidence and logical discussion and acknowledges sources of ideas and information.

OR

- an opportunity to conduct and report a piece of empirical research in the field of education.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Following consultation and needs analysis and discussion with tutors, students select either a topic within an area of scholarship or a topic for empirical research within the field of education. Students write a 15,000 word dissertation in consultation with their supervisor. In order to undertake the study, students select and read appropriate theoretical and methodological literature in consultation with their supervisor. The study for the dissertation builds on the Foundation Research Methods module, which is a pre-requisite.

Learning outcomes

By the end of the module, students should be able to:

- Demonstrate detailed knowledge and understanding of a specific topic within the field of education
- Written communication skills
- Demonstrate use of information technology via analysis of qualitative data, quantitative data, or use of e-resources in the library, e.g. literature searches
- Use of relevant research skills
- Demonstrate ability in critical analysis
- Demonstrate ability to understand and articulate new concepts
- Demonstrate ability to plan and structure a sustained report of research or a piece of sustained academic scholarship related to education
