

PO102-30 Political Research in the 21st Century

22/23

Department

Politics & International Studies

Level

Undergraduate Level 1

Module leader

Justin Greaves

Credit value

30

Module duration

22 weeks

Assessment

100% coursework

Study location

University of Warwick main campus, Coventry

Description

Introductory description

N/A

Module aims

This is a module in research and study skills. It will provide students with a thorough grounding in study skills, so as to promote independent learning and provide a solid foundation for students in the first year of their undergraduate degree. It will provide an introductory overview of research methods, approaches and methodology, therefore allowing students to critically interrogate the political science literature. It will engage the student as an 'active researcher' equipped with effective study and research skills and, thereby, promote employability and personal development. The module will also emphasise the distinctiveness or otherwise of politics as a discipline and its position as a junction subject and the implications this has for research methods and techniques.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Lecture/seminar topics will include:

Being a political researcher: Student as Producer

Essay writing and referencing

The internet as a research tool

Researching general elections: voting behaviour

Social surveys & opinion polls

Ethical issues and plagiarism

Conspiracy theories and counterfactuals

Using statistics in political science

Researching pressure groups

Learning outcomes

By the end of the module, students should be able to:

- appreciate the strengths and weaknesses of the principal research methods, approaches and techniques, qualitative and quantitative, used in the study of Politics and International Relations.
- Be familiar with the process of research design and the major stages that are involved in designing a research proposal.
- understand the ethical dilemmas that arise in the research and study process, including issues of plagiarism, and strategies available for resolving them.
- To develop skills as an 'independent learner' and 'researcher'. To be confident and equipped in foundation level university study skills, including the critical analysis of a wide range of sources for research and study purposes.
- develop transferable skills To appreciate how academic skills translate into the 'transferable' and 'soft' skills required in employment and life beyond university.

Research element

Central to the module are the themes of 'student as producer' and 'student as researcher'.

This provides a strong basis should students wish to take advantage of research opportunities at the University and beyond, such as the Undergraduate Student Research Scheme (URSS), the International Conference of Undergraduate Research (ICUR), or the Reinvention Journal.

Interdisciplinary

A running theme of the module is the nature of politics and international studies as an interdisciplinary discipline and a junction subject. One of the topics focuses specifically on Crossing the Interdisciplinary Divide.

International

The module focuses on methods and techniques in international studies and international relations, as well as political science. Students are encouraged to bring out global examples to illustrate their points.

Subject specific skills

tbc

Transferable skills

The module provides students with opportunities to acquire or develop the following key skills:

Written communication skills

Oral communication skills

Problem-solving skills

Skills in the use of the internet and information technology

Skills of interpretation and the critical analysis of primary and secondary sources

Awareness and sensitivity to diversity (in terms of people, cultures) and the ability to understand unfamiliar ideas and ways of thinking

the ability to digest, retain and apply complex information and ideas

Ability to conduct research and reference their work appropriately

Time management skills and the ability to meet deadlines.

The ability to reflect critically on the extent and limitations of how and what they have learned, discovered and understood

Quantitative and qualitative techniques

Teamwork and working with other students

Employers of all kinds tell us these are the skills they need and which you can transfer into the workplace. Employers are seeking confident, self assured graduates and PR21, along with other modules in PAIS, will help provide you with the evidence and skills to demonstrate you possess such qualities.

Study

Study time

Type	Required
Lectures	20 sessions of 1 hour (7%)
Seminars	20 sessions of 1 hour (7%)
Other activity	1 hour (0%)
Private study	259 hours (86%)
Total	300 hours

Private study description

tbc

Other activity description

Library workshop.

Costs

No further costs have been identified for this module.

Assessment

You do not need to pass all assessment components to pass the module.

Students can register for this module without taking any assessment.

Assessment group A2

	Weighting	Study time	Eligible for self-certification
Assessment component			
Assessed Presentation	10%		Yes (extension)
Reassessment component is the same			
Assessment component			
Assessed Essay/Project	90%		Yes (extension)
Students submit 3 assignments. The first two are 2,500 words. The final assignment is a 3000 word project. The two highest marks count equally weighted (45% each), determining 90% of the module mark. In other words, the weakest assignment mark is discarded.			
Reassessment component is the same			

Feedback on assessment

Essay feedback will be returned within 20 working days of essay submission
Formative and summative feedback will be provided in accordance with standard PAIS practice.
