

# PS348-15 Issues in Families and Development

**22/23**

**Department**

Psychology

**Level**

Undergraduate Level 3

**Module leader**

Fiona MacCallum

**Credit value**

15

**Module duration**

12 weeks

**Assessment**

33% coursework, 67% exam

**Study location**

University of Warwick main campus, Coventry

---

## Description

### Introductory description

This module focuses on child development in unusual circumstances

[Module web page](#)

### Module aims

This is an advanced module focusing on child development in unusual circumstances, whether because of the family situation or a disorder of development. The first part of the module focuses on child development in different family situations, including single parent families, same-sex couple families, families created using assisted reproduction, and adoptive families. The significance of other family factors, such as parental psychological health and interparental relationships, for child development is also considered. The second part of the module focuses on difficulties and disorders of development, including dyslexia, autism, attention deficit disorder and language impairment. Issues in the definition and diagnosis of developmental disorders are also examined.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

- 1 Parental psychiatric difficulties and interparental conflict
  - 2 Single parent families
  - 3 Lesbian mother and gay father families
  - 4 Assisted reproduction families
  - 5 adoptive families
  - 6 Language impairment
  - 7 Attention deficit hyperactivity disorder
  - 8 Autism and pervasive developmental disorders
  - 9 Deafness
  - 10 Dyslexia
- 
- 1 Revision
  - 2 Revision

## **Learning outcomes**

By the end of the module, students should be able to:

- Show an understanding of the interaction between genetics and the environment in determining a child's development
- Assess the influence of interparental conflict and parental psychiatric disorder on children's psychological development
- Understand how family structure can affect development, with particular reference to parental absence and non-genetic relationships
- Identify the aspects of parenting and child development that may differ between natural conception families and those created through assisted reproduction or adoption, and explain the reasons for these differences
- Consider the issues involved in prognosis of children with developmental disorders, and how these can be affected by intervention
- Demonstrate knowledge of the symptoms and possible causes of a range of developmental difficulties, including autism, language impairment and ADHD

## **Indicative reading list**

Empson, J. (2015) *Atypical Child Development in Context*. (2nd ed.) London: Palgrave  
Golombok, S. (2015) *Modern Families*. Cambridge: CUP  
Golombok, S. (2000) *Parenting: What really counts?* London: Routledge  
Norbury, C. F., Tomblin, B., & Bishop, D. V. M. (2008) *Understanding developmental language disorders: from Theory to Practice*. Hove: Psychology

## **Subject specific skills**

- Understanding of the influence of interparental conflict, parental psychiatric disorder and family structures on children's psychological development.

- Evaluation of issues in prognosis and possible interventions in developmental disorders.
- Understanding of symptoms and possible causes of a range of developmental difficulties.
- Understanding of the interaction between genetics and the environment in a child's development.
- Identifying the mechanisms by which family processes affect children's development, and the implications for interventions.

## Transferable skills

- effective communication skills to develop a cogent argument supported by relevant evidence and being sensitive to the needs and expectations of an audience;
  - familiarity with collecting and organising stored information found in library book and journal collections, and online, critically evaluating primary and secondary sources;
  - effective personal planning skills
- 

## Study

### Study time

Type	Required
Lectures	12 sessions of 2 hours (16%)
Seminars	10 sessions of 1 hour (7%)
Private study	116 hours (77%)
Total	150 hours

### Private study description

116 hours guided student study

### Costs

No further costs have been identified for this module.

---

## Assessment

You do not need to pass all assessment components to pass the module.

Students can register for this module without taking any assessment.

### Assessment group D3

	<b>Weighting</b>	<b>Study time</b>
Essay	33%	
Exam	67%	

## **Feedback on assessment**

Assessed via annotated copy and academic guidance form; exam performance via personal \rntutor or online.

## **Availability**

### **Courses**

This module is Optional for:

- Year 1 of TPSS-C8P9 Postgraduate Taught Psychological Research
- Year 3 of UPSA-C800 Undergraduate Psychology
- Year 4 of UPSA-C801 Undergraduate Psychology (with Intercalated year)
- Year 3 of UPSA-C804 Undergraduate Psychology with Education Studies
- Year 4 of UPSA-C806 Undergraduate Psychology with Education Studies (with Intercalated Year)

This module is Option list A for:

- Year 3 of UPSA-C804 Undergraduate Psychology with Education Studies

This module is Option list B for:

- Year 3 of UPHA-VL78 BA in Philosophy with Psychology
- Year 4 of UPHA-VL79 BA in Philosophy with Psychology (with Intercalated year)
- Year 1 of TPSS-C8P9 Postgraduate Taught Psychological Research

This module is Option list C for:

- Year 3 of UPSA-C802 Undergraduate Psychology with Linguistics
- Year 4 of UPSA-C805 Undergraduate Psychology with Linguistics (with Intercalated Year)

This module is Unusual option for:

- Year 4 of UPSA-C805 Undergraduate Psychology with Linguistics (with Intercalated Year)
