

SO247-15 Relationship and Family Change: Demographic and Sociological Perspectives

22/23

Department

Sociology

Level

Undergraduate Level 2

Module leader

Richard Lampard

Credit value

15

Module duration

9 weeks

Assessment

100% coursework

Study location

University of Warwick main campus, Coventry

Description

Introductory description

Students will gain a knowledge of various aspects of relationship and family change in Britain and elsewhere, an understanding of how such change might be explained, and of different approaches to explanation in that context, and an awareness of a range of conceptual and empirical resources that can be used as the basis of such explanations.

[Module web page](#)

Module aims

The module aims to examine relationship and family change from demographic, sociological and other perspectives, linking this to other forms of social change, and examining both its origins and also some of its consequences. The contribution of both quantitative and qualitative research to understanding change will be highlighted.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Week 1: Introduction

Week 2: Theoretical and public perspectives on relationship and family change

Week 3: Marriage, the family and population in historical Britain

Week 4: Marital formation I: The rise of later marriage, cohabitation and LAT relationships

Week 5: Marital formation II: Homogamy and heterogamy

Week 6: (Reading week)

Week 7: Contemporary relationships: Problems and interventions

Week 8: Relationship dissolution

Week 9: The formerly married and lone parents

Week 10: Stepfamilies

Learning outcomes

By the end of the module, students should be able to:

- Consider in an informed and analytical way a range of demographic and sociological issues relating to various aspects of relationship and family change in Britain and elsewhere.
- Understand the complementary roles of cultural factors, economic factors and a range of other factors in the explanation of relationship and family change.
- Understand the value and limitations of theoretical contributions, quantitative data and qualitative data as a basis for understanding relationship and family change.
- Interpret published demographic research competently and with an appropriate degree of caution, and recognise the importance of empirically-based journal articles to academic work in the field of relationship and family change.
- Draw appropriately upon relevant substantive, empirical and conceptual material within a coherent and accurate discussion on a topic relating to relationship or family change.

Interdisciplinary

This module draws upon sociological, demographic and other disciplinary perspectives/material.

International

While the module has a UK focus, much of the reading material and many of the themes are internationally-orientated.

Subject specific skills

Apply sociological and demographic theories and ideas to specific aspects of family and/or relationship change.

Communicate in essay form a description and analysis of a social process or phenomenon, recognising that it may be complex in nature and require a suitably multi-faceted approach to be discussed appropriately.

Transferable skills

Appreciate the use of different types of data to gain a full understanding of a phenomenon or process.

Understand that data and theories paint partial pictures of phenomena, and need to be assessed critically.

Study

Study time

Type	Required
Lectures	9 sessions of 1 hour (6%)
Seminars	9 sessions of 1 hour (6%)
Private study	132 hours (88%)
Total	150 hours

Private study description

Reading for seminars.

Preparation for seminars

Preparation and writing of formative work

Preparation and writing of summative work

Costs

No further costs have been identified for this module.

Assessment

You must pass all assessment components to pass the module.

Students can register for this module without taking any assessment.

Assessment group A1
