## Description

### Introductory description

EC313-15 The International Economy in the Twentieth Century

[Module web page](#)

### Module aims

The module aims to introduce students to the problems and features of the international economy during the twentieth century. Understanding the booms and the crises of the last century will help the students analyse contemporary events in a historical perspective. It will also contribute to an understanding of general patterns of growth and recessions and how policies can matter.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

The module will typically cover the following topics:

Interwar Years: changes in the international economy

The Great Depression and Recovery

Golden Age in Europe: Post war reconstruction and high growth

East Asian Miracle and Africa's growth tragedy

## **Learning outcomes**

By the end of the module, students should be able to:

- Demonstrate familiarity with some applications of economics that are specific to the theories of international trade and finance, growth and recession and the relevance of geography, history and institutions in economic development. ## Feedback on assessment

The Department of Economics is committed to providing high quality and timely feedback to students on their assessed work, to enable them to review and continuously improve their work. We are dedicated to ensuring feedback is returned to students within 20 University working days of their assessment deadline. Feedback for assignments is returned either on a standardised assessment feedback cover sheet which gives information both by tick boxes and by free comments or via free text comments on tabula, together with the annotated assignment. For tests and problem sets, students receive solutions as an important form of feedback and their marked assignment, with a breakdown of marks and comments by question and sub-question. Students are informed how to access their feedback, either by collecting from the Undergraduate Office or via tabula. Module leaders often provide generic feedback for the cohort outlining what was done well, less well, and what was expected on the assignment and any other common themes. This feedback also includes a cumulative distribution function with summary statistics so students can review their performance in relation to the cohort. This feedback is in addition to the individual-

specific feedback on assessment performance.
