Study location

University of Warwick main campus, Coventry

Description

Introductory description

This module aims to introduce students to some of the key economic concepts and perspectives related to global sustainable development. In particular, by adopting problem-based learning as a teaching and learning model, it examines the relationship between Economics and Public Policy in sustainable development, and the ways in which economists address real-world dilemmas linked to sustainable development.

Module aims

This module aims to introduce students to some of the key economic concepts and perspectives related to global sustainable development. In particular, by adopting problem-based learning as a teaching and learning model, it examines the relationship between Economics and Public Policy in sustainable development, and the ways in which economists address real-world dilemmas linked to sustainable development.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be

covered. Actual sessions held may differ.

An Introduction to Global Sustainable Development in Economics

- How Do Economists Measure Sustainable Development?

The 'Fundamental' Determinants of Economic Development: Geography vs. Institutions

Economic Development, Poverty and the Environment

The Economic Case for Sustainable Development Intervention: Market Failure

- Externalities. Human Capital Investment
- The 'Tragedy of the Commons'. Environmental Quality
- Risk and Uncertainty. Land Productivity
- Asymmetric Information. Access to Credit

The Economic Case for Sustainable Development Intervention: Governance Failure

- The Principal-Agent Approach to Governance

Learning outcomes

By the end of the module, students should be able to:

- Apply fundamental economic principles and techniques to the analysis of global sustainable development problems and describe how economic activity relates to social and environmental development
- Understand the basic measures of economic development, criticise these methods, and discuss the advantages and disadvantages of alternative frameworks to measure sustainable economic progress
- Understand some of the most important economic cases for sustainable development policy intervention, such as theories of externalities, theories of ethics and efficiency, game theoretical explanations of collective outcomes, theories of property rights and decision-making under risk and uncertainty
- Interpret abstract economic models and apply basic quantitative information about global sustainability towards explaining and evaluating policy design
- Demonstrate an ability to undertake independent learning and research.

Interdisciplinary

This is a core module on the Global Sustainable Development course which adopts an interdisciplinary approach spanning the arts, humanities, social and natural sciences fields in order to engage with the major global challenges facing contemporary society, explore these 'big problems,' from a variety of perspectives and consider a range of possible solutions.

Subject specific skills

Apply fundamental economic principles and techniques to the analysis of global sustainable development problems and describe how economic activity relates to social and environmental development.

Understand the basic measures of economic development, criticise these methods, and discuss the advantages and disadvantages of alternative frameworks to measure sustainable economic progress.

Understand some of the most important economic cases for sustainable development policy intervention, such as theories of externalities, theories of ethics and efficiency, game theoretical explanations of collective outcomes, theories of property rights and decision-making under risk and uncertainty.

Interpret abstract economic models and apply basic quantitative information about global sustainability towards explaining and evaluating policy design.

Transferable skills

Ability to undertake independent learning and research.

Study

Study time

Type	Required
Lectures	9 sessions of 1 hour (32%)
Seminars	10 sessions of 1 hour 30 minutes (54%)
Other activity	4 hours (14%)
Total	28 hours

Private study description

Reading and preparation for workshops

Other activity description

2x2-hour roundtable discussion sessions.

Costs

No further costs have been identified for this module.

Assessment

You do not need to pass all assessment components to pass the module.

Students can register for this module without taking any assessment.

Assessment group D1

	Weighting	Study time
Group presentation	20%	
Essay	40%	
Online Examination	40%	
2-hour online examination		
~Platforms - AEP		

- Online examination: No Answerbook required

Feedback on assessment

All feedback will be published on Tabula; individual consultations will be set up for face-to-face feedback.
