Study location

University of Warwick main campus, Coventry

Description

Introductory description

This is a core module available to Foundation Year students only.

[Module web page](#)

Module aims

To provide students with an introduction to key concepts and practices within the fields of Accounting and Finance. To understand how accounting information informs the efficient running of the business and supports managers in making decisions.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Accounting:

- The notion of profit – how incomes and expenses are measured and recorded and use to

determine profit.

- Budgeting for planning and decision-making.
- The cash cycle – how cash differs from profit and the importance of working capital within a business.
- Capital and revenue expenditure.
- Preparing basic Financial Statements for a sole-trader entity – including the profit or loss and the financial position statement.
- Basic decision-making and performance-appraisal accounting techniques to support managerial decisions – including basic costing techniques, pricing and financial statement analysis.

Finance:

- Returns and percentage changes.
- Linear equations.
- Interest rates, simple interest and interest with compounding. Equivalent annual rates.
- Concept of present value, including annuities and perpetuities.
- Internal rate of return.

Learning outcomes

By the end of the module, students should be able to:

- Understand the purposes of accounting and how to make use of the key analytical tools to analyze financial data accounting information is used in a business context.
- Be aware of the connections between accounting and the rest of the business world.
- Understand the purpose of finance in the business context.
- Make use of the key analytical tools to analyse financial data.
- Appreciate the nature of accounting information.
- Identify key limitations of accounting information.
- Apply basic accounting concepts and practices to analyse business problems.
- Reflect critically on how to employ data for financial decision making.
- Apply basic quantitative methods to interpret financial data.
