## Description

### Introductory description

This is an elective module available for WBS and non-WBS students.

During the module we will look at issues affecting finance markets (debt and equity) for new ventures and small firms. These 'entrepreneurial' firms are typically informationally opaque and therefore find it harder to obtain finance than large firms. We will look at issues affecting the supply of entrepreneurial finance e.g., credit rationing and equity gaps; and issues affecting demand e.g., control aversion and entrepreneurial over-optimism.

There are three key stakeholder groups in entrepreneurial finance: entrepreneurs who want money to fund their ideas; finance providers (banks, angels, and venture capitalists), who want to make money from funding entrepreneurs; and government, which wants good entrepreneurs to receive funding and create jobs. The module therefore views entrepreneurial finance issues from the perspectives of entrepreneurs, finance providers, and government.

### Module aims

Broaden students' understanding of new venture financial markets.

Equip students with skills necessary for both raising finance for and evaluating investment

opportunities in new ventures.

Provide students with a deep analytical understanding of new venture finance theory and practice.

## **Outline syllabus**

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

- Introduction providing an overview of key issues including: the principal causes of financial constraints for new ventures; the role of financial intermediaries; the role of government support (British Business Bank); sources of entrepreneurial finance; the pecking order of entrepreneurial finances.
- The entrepreneurial context for new venture finance: What is an entrepreneur? What makes an entrepreneur?
- Evaluating new ventures for finance: venture capitalist and banker perspectives.
- Theory and evidence of credit rationing in new venture debt markets: Are entrepreneurs financially constrained?
- Developments in lending technologies for new ventures: Has the introduction of credit scoring for small business loans improved access to finance among new ventures? The role of asset finance and asset-based lending (invoice finance) in helping overcome financial constraints.
- Government intervention in new venture financial markets: The rationale for intervention: market failure. Is there a systemic market failure or is it restricted to particular types of business or capital? Examples of public assistance in new venture debt and equity markets (e.g., the Enterprise Finance Guarantee).
- Is there ethnic and/or gender discrimination in entrepreneurial finance markets?
- Developments in crowdfunding and peer-to-peer lending. Have these developments helped democratise entrepreneurial finance?
- Equity finance: Why are venture capital backed start-ups so rare; what are the rare qualities of these start-ups? What do venture capitalists do and how do they add value to their portfolio companies? How do venture capitalists value their portfolio companies?
- Harvesting equity investments.

## **Learning outcomes**

By the end of the module, students should be able to:

- Understand the role and impact of access to finance on the performance of new ventures.
- Appreciate the rise in the importance of entrepreneurial markets and the history of economic thought on entrepreneurship.
- Understanding core economics and financial economics relating to new venture performance.
- Identify the sources of finance available eg loans , the various equity markets and government funding for new enterprise andcritically evaluate these.
- Apply the analysis covered on the course to a number of genuine case studies.
- Ability to recall and select relevant information.
- Analytical and logical reasoning abilities.

- Ability to evaluate information and draw a valid conclusion.
- Ability to understand issues from different perspectives.
