Description

Introductory description

Law holds a special place in the governance of the global economy. The rule of law, along with regulation, is widely regarded as an essential prerequisite to wider processes of capitalist economic development. It regulates property relations, as well as the conditions of trade and investment.

This course examines the theory, development and practice of law in the global economy from a critical perspective. Put simply, it is about legal text and context. As a preliminary step the module outlines some of the key institutions in the global economic order, most notably the International Monetary Fund, the World Trade Organisation and the Bank of International Settlements. In formal terms these lie at the heart of the trade and finance regime (both of which have undergone a remarkable transformation in the post war period). We are also concerned with the economic and political dynamics under which these institutions operate and what this tells us about the potentialities as well as inherent limitations of law in the global economy.

Students will be asked to reflect upon those factors that governed the emergence and evolution of these institutions and examine why they are increasingly seen as no longer 'fit for purpose'. These are normative as well as technical questions. Although trade and financial crises, and the fear of crises, have been among the main drivers in the development of economic institutions; law and regulation have been accorded a special status in forestalling these crises. We routinely talk about the capacity of legal "mechanisms" to resolve trade disputes as well as other disputes (for instance

Argentinian bonds). This course critically explores the operation of these mechanisms through a variety of case studies. We also consider the wider question of what this means to the participants themselves, particularly countries with a developmental agendas. Their agendas often conflict with global economic institutions. We explore why.

Module aims

By the end of the module the student should be able to: Identify the key institutions and processes of global economic governance Locate the legal and regulatory foundations of the global economy within a broader context of social, political and economic development Demonstrate a critical understanding of how international economic regulatory regimes interact with other spheres of international and domestic law Engage in critical debate and analysis of the structures of global economic governance and how they affect local and national forms of social, economic and political development

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Introduction: Globalization, International Economic Lawmaking and the Challenge of Global Economic Governance

The political economy of postwar International economic architecture: Bretton Woods and beyond

The transformation of the global trading and finance system

The financial crisis of 2008 and beyond

The spectre of currency and trade wars

Winners and losers: the political economy of economic governance

Legal contribution to the challenges of systemic stability, sustainability and social justice

Learning outcomes

By the end of the module, students should be able to:

- Identify the key institutions and processes of global economic governance
- Locate the legal and regulatory foundations of the global economy within a broader context of social, political and economic development and ecological sustainability
- Demonstrate a critical understanding of how international economic regulatory regimes interact with other spheres of international and domestic law, notably laws relating to social welfare and development, international human rights and environmental law
- Engage in critical debate and analysis of the structures of global economic governance and how they affect local and national forms of social, economic and political organisation
- Demonstrate an ability to work effectively in groups to examine specific topics related to the

module

- Demonstrate an advanced ability to deliver effective oral presentation skills
- Demonstrate an advanced ability to assess critically the legal, political and public texts relating to the subject of law and the global economy
- Demonstrate high quality research, interpretation and drafting skills in relation to texts on the making of law and the global economy
