

MA262-15 Scientific Communication

23/24

Department

Warwick Mathematics Institute

Level

Undergraduate Level 2

Module leader

Helena Verrill

Credit value

15

Module duration

45 weeks

Assessment

Multiple

Study location

University of Warwick main campus, Coventry

Description

Introductory description

It is a multifaceted module covering various aspects of scientific communication from presenting a research paper to presenting yourself to the job market.

Module aims

Complete learning of Python. Learn LaTeX and Excel. Review the first year material at the beginning of the second year. Prepare the students for the job market. Provide an opportunity for students to learn Mathematics directly from books and other sources and to develop research skills. Develop written and oral exposition skills.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

- Latex, Python and Excel mini-courses on moodle
- Year 1 Refresher
- Employability study
- Mathematical Essay

Learning outcomes

By the end of the module, students should be able to:

- Learn how to write Mathematics
- Practice various presentation skills
- Improve the programming skills in Python
- Develop research skills
- Learn essential transferrable skills improving job market competitiveness

Indicative reading list

The reading list is going to change due to the extended remit of this module

[View reading list on Talis Aspire](#)

Research element

The students will research their own topics for the essay, and look through many sources to come up with their own story but they will not be doing any original research.

Subject specific skills

It is a multi-component module, where the students will learn several research and communication tools. It will include further mastering of Python as well as getting familiar with LaTeX and Excel. For the essay itself the students have the opportunity to choose their own topic, and then to learn some in-depth mathematics directly from books and other sources. They will develop written and oral exposition skills and learn how to write mathematics well. They will develop research skills, including planning, use of library and the internet.

Transferable skills

- independent study
- research skills
- formal writing & typesetting
- essay and curriculum vitae writing
- presentation skills
- experience of working under a supervisor
- Python, Excel and LaTeX (which could be replaced if other tools become standard)

Study

Study time

Type	Required
Online learning (independent)	4 sessions of 3 hours (10%)
Private study	32 hours (26%)
Assessment	79 hours (64%)
Total	123 hours

Private study description

Research for various components

Costs

No further costs have been identified for this module.

Assessment

You do not need to pass all assessment components to pass the module.

Assessment group A1

	Weighting	Study time	Eligible for self-certification
Essay	50%	50 hours	No
Word limit: 12 pages			
Essay Presentation	10%	4 hours	No
Essay presentation			
Python Mini-Course Assessment	30%	10 hours	No
Moodle based mini-course assessment			
Year 1 Refresher Homework	10%	15 hours	No
Long homework to refresh the first year linear algebra and analysis			

Assessment group R1

	Weighting	Study time	Eligible for self-certification
Essay	60%		No
Word limit: 12 pages			
Python Mini-Course 3 Assessment	40%		No

Feedback on assessment

Formative feedback available from the personal tutor throughout year. Assessment of earlier components is available during the year.

Availability

Courses

This module is Core for:

- Year 2 of UMAA-G105 Undergraduate Master of Mathematics (with Intercolated Year)
- Year 2 of UMAA-G100 Undergraduate Mathematics (BSc)
- UMAA-G103 Undergraduate Mathematics (MMath)
 - Year 2 of G100 Mathematics
 - Year 2 of G103 Mathematics (MMath)
- Year 2 of UMAA-G1NC Undergraduate Mathematics and Business Studies
- Year 2 of UMAA-G1N2 Undergraduate Mathematics and Business Studies (with Intercolated Year)
- Year 2 of UMAA-G101 Undergraduate Mathematics with Intercolated Year

This module is Option list A for:

- Year 2 of UMAA-GL11 Undergraduate Mathematics and Economics
- Year 2 of UECA-GL12 Undergraduate Mathematics and Economics (with Intercolated Year)
