Description

Introductory description

This module focuses on key topics in philosophy and related disciplines which are concerned with engagement in beauty practices and body-modification in an increasingly visual and virtual culture. It will explore the changing value placed on appearance, as measuring up to beauty ideals becomes increasingly connected to identity. It will consider how the demands of beauty are changing, as the current ideal becomes more dominant and demanding. Dominant, in that it applies to more people more of the time, applying to professions and demographics which it previously didn't, and to boys and men as well as women and girls up and extending into illness and old age. Demanding, in that more is required to attain the grade, from the naturalising of body hair removal, such that this is now regarded as a health and hygiene practice rather than a form of beautification or adornment, to the routinising of body modification, in the form of cosmetic surgery, tattooing, diet and exercise. The module will also consider how and the extent to which the increased focus on appearance changes what we value and how we perceive ourselves and others and how we should respond as individuals and collectively.

Module aims

The module will enable students to crucially engage with philosophical debates around appearance. The module will equip students to understand how appearance is valued, how it is

connected to identity, and how this is changing as culture becomes more image-based. It will introduce students to key ethical debates about how appearance norms should be addressed, including: whether engagement is a 'choice' which should be respected; whether some practices, such as some types cosmetic surgery, should be prohibited; whether objectification of the body (or some bodies) is always harmful; and whether lookism should be regulated in a similar way to sexism and racism.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Illustrative topics include:

- The way that beauty is valued in today's culture
- The difference between current ideals and past ideals
- Whether (and how) beauty practices should be regulated
- The extent to which beauty ideals are raced and gendered
- The way that key concepts such as 'natural' and 'normal' function evaluatively in discussions of appearance
- How useful are critiques of objectification in a visual culture where images of faces and bodies are ubiquitous?
- What place do the moral emotions of blame and shame have in policing beauty engagement?
- Does intention matter to the ethics of body modification?
- Can we untangle 'choice' from 'cohesion' in the current cultural moment?
- Is it unethical, morally suspect, to engage in beauty practices and modification?
- Should we regard all types of body modification, body building, cosmetic surgery, make-up, in a similar way? If not, what criteria should we use to distinguish between practices?
- Should we regulate certain forms of body modification? Are there criteria we could use, for example, with regard to the risk involved, or the motivation?
- How does beauty impact on inequality? Does it enhance equality that men are increasingly subject to unrealistic body ideals as women have long been? Does beauty subvert power hierarchies?
- Is 'lookism', appearance discrimination, similar to sexism or racism?
- Should lookism be illegal? What would be the protected characteristic?
- What duties do individuals have in responding to the beauty ideal and appearance norms?

Learning outcomes

By the end of the module, students should be able to:

- By the end of the module the student should have an understanding and knowledge of the value of appearance in contemporary culture and of how beauty ideals and engagement are theorised in philosophical debate.
- By the end of the module the student should be able to participate in debates about how appearance matters in contemporary culture, and to articulate arguments for and against different positions in a systematic and clear way.

- By the end of the module the student should be able to analyse and critically evaluate arguments for different understandings of appearance, and ethical responses to appearance norms, and come to an independent assessment of their relative merits.
- Identify relevant media and social media instances, analyse texts and/or images in context with reference to philosophical theory
