

# ET116-30 Culture, Cognition and Society

**24/25**

**Department**

Applied Linguistics

**Level**

Undergraduate Level 1

**Module leader**

Clay Beckner

**Credit value**

30

**Module duration**

20 weeks

**Assessment**

50% coursework, 50% exam

**Study location**

University of Warwick main campus, Coventry

---

## Description

### Introductory description

Is human cognition (the way the mind works) universal? Or do culture and society affect how we see the world? How do we understand (or misunderstand) each other in a multi-cultural society? In this module you will first learn about important aspects of cognition, such as perception, attention and memory before going on to examine the extent to which cognition is influenced by culture and society.

[Module web page](#)

### Module aims

The module aims to provide students with a thorough and critical understanding of concepts, theories and research findings of cognitive and social psychology and how these apply across different cultures.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be

covered. Actual sessions held may differ.

## INTRODUCTION TO PSYCHOLOGY AND CULTURE

## Learning outcomes

By the end of the module, students should be able to:

- Provide a thorough grounding in theories and research findings related to intercultural interaction and linguistics. Provide a solid foundation in relevant research skills and methods, both quantitative and qualitative; Enable students to analyse cross-linguistic features and contexts, and authentic cross-cultural and intercultural discourses using both quantitative and qualitative methods. Enable students to undertake an in-depth study of issues relating to intercultural linguistics.

## Indicative reading list

Matsumoto, D. & Juang, L. (2013). Culture and psychology. Fifth Edition. Cengage Learning

Berry, J. W., Poortinga, Y. H., Breugelmans, S. M., Chasiotis, A., Sam, D. L. (2011) Cross-cultural psychology: Research and applications. Third Edition. Cambridge: CUP.

Hewstone, M., Stroebe, W., & Jonas, K. (2015) An introduction to social psychology. Sixth Edition. Wiley.

Galotti, K. M. (2014) Cognitive psychology in and out of the laboratory. Fifth edition. Sage.

Heine, S. (2011). Cultural psychology. Second Edition. Cengage Learning

## Research element

Students in this module will read and critically analyse empirical studies of culture, cognition, and society. For summative essays, students should conduct independent research into studies in

these areas.

## **Interdisciplinary**

The module integrates theories and findings from linguistics, cognitive psychology, social psychology, anthropology, intercultural communication studies, and other fields.

## **International**

This module incorporates theories and examples from multiple national, cultural, and linguistic contexts. The module also promotes active learning and intercultural reflection amongst a highly international cohort of students.

## **Subject specific skills**

Understand and explain key concepts, models and research findings relating to culture, cognition and society

Understand and explain similarities and differences in cognition and behaviour across cultures

Understand and explain key concepts, models and research findings relating to attitudes, beliefs and values in the field of cross-cultural psychology

Be familiar with the main concepts and terminology of cognitive psychology, social psychology and cross-cultural psychology

Understand and explain similarities and differences in cognition and behaviour across cultures

Understand and explain key concepts, models and research findings relating to attitudes, beliefs and values in the field of cross-cultural psychology.

## **Transferable skills**

Communicate effectively in English in mixed cross-cultural groups

Work effectively with others in group work

Use a range of tools and resources effectively in the preparation of coursework

Retrieve, evaluate critically and select relevant information to support coherent arguments

Critically evaluate key concepts, models and research findings relating to culture, cognition and society.
