Module aims

This module will offer foundation students an introduction to the study of Criminal Law. Students will learn to apply criminal terminology to case studies involving non-fatal offences and general defences. This will allow students to develop the skills necessary to interpret and argue complex criminal scenarios, and understand real-life decisions for charging and sentencing offenders. In addition, students will develop evaluative skills through an insight into the flaws found in current legal definitions, particularly the non-fatal offences.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

In Introduction to Criminal Law, students will be introduced to the requirements for criminal liability, demonstrated through an in-depth study of a range of non-fatal offences and general defences. The module also offers students the opportunity to critically evaluate the law in this area.

Learning outcomes

By the end of the module, students should be able to:

- Explain the fundamental aspects of criminal liability, including actus reus, causation and mens rea.
- Explain a range of common law and statutory non-fatal offences, and general defences.
- Construct and present arguments through appropriate and effective legal reasoning.
- Evaluate the law and recognise the role of the Law Commission in proposing changes to criminal law.
- Demonstrate a range of key competences including critical analysis, communication and presentation skills, and research skills (including information retrieval, interpretation of laws and citation).

Research element

For Summative 1, students will research and discuss some of the Law Commission proposals for reform of the non-fatal offences.

International

For Summative 1, students are given the opportunity to explore how the non-fatal offences are defined and applied in other jurisdictions, to allow for critical analysis of the current approach taken in England and Wales.

Subject specific skills

Develop detailed understanding of criminal liability for non-fatal offences. Identify relevant issues in criminal situations, from which to formulate questions and conduct investigatory research. Appreciate differences between establishing liability in different areas of the law. Apply Criminal Law concepts competently to analyse specific questions or issues. Articulate reasoned arguments in a clearly-structured format in response to Criminal Law issues that arise in a scenario. Evaluate the law and recognise the role of the Law Commission in proposing changes to the Criminal Law. Draw upon appropriate sources of law to support reasoning. Employ tools of legal analysis to

construct persuasive arguments and justified conclusions. Develop skills in OSCOLA referencing.
