Description

Introductory description

This is an elective module for Intermediate and Finalist non-WBS students (Finalists can select this module as an unusual option). It can be taken on it's own, or along with other WBS modules as part of the Business and Management pathway. Please speak to your home department for more information.

The module aims to provide students with a broad introduction to financial and management accounting from a managerial or user perspective rather than that of an accounting specialist.

Module aims

The module aims to provide students with a broad introduction to financial and management accounting from a managerial or user perspective rather than that of an accounting specialist.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

1. Measuring and reporting financial position: overview of the main financial statements;

classification of assets and liabilities; accounting conventions and concepts; basic construction and meaning of the statement of financial position.

2. Measuring and reporting financial performance: the relationship between the income statement and the statement of financial position; recognising revenue and expenses; layout of income statement; depreciation; cost of sales; basic construction and understanding of an income statement (profit and loss account).
3. Measuring and reporting cash flows: the importance of cash flow; differences between cash and profit; construction and analysis of basic cash flow statements.
4. Analysing and interpreting financial statements: using various ratios to enable a firm's performance to be analysed and compared to its peers or its own performance over time; limitations of ratio analysis.
5. Cost-volume-profit analysis: classification of costs; break -even analysis; using relevant costs to inform short -term decision making.
6. Full costing in single and multi-product businesses; total absorption costing; introduction to activity -based costing.
7. Budgeting: the relationship between budgeting and strategy; how budgets link to each other; preparation of budgets; introduction to variance analysis; using budgets as control devices – behavioural considerations

Learning outcomes

By the end of the module, students should be able to:

- Evaluate the importance of financial and management accounting as business tools and the nature and importance of accounting information to a broad range of users.
- Prepare basic financial statements, including the Income Statement and Statement of Financial Position, and critically comment on the links between these statements of financial performance and position.
- Effectively use and apply a range of basic accounting tools to assist management decision-making, planning, control and performance appraisal in a range of contexts.
- Identify the limitations of accounting information and evaluate the implications of these for the analysis, interpretation and use of that information.
- Analyse and interpret a range of different types of accounting information and effectively communicate results or responses to user groups using appropriate financial language.
- Interpret ratios in order to analyse position of firm, demonstrating understanding of the limitations of this type of analysis
- Calculate important ratios using financial statement information

Subject specific skills

Construct simple versions of the three main financial statements from relevant information

provided.

Use traditional full-costing techniques to deduce the full cost of a unit of output in both a single-product and a multi-product environment.

Construct budgets from relevant data; and flex budgets to take account of changes in output.

Transferable skills

Provide clear written explanations of various aspects of the module, including: the use of budgets as tools for achieving organisational objectives; the advantages and disadvantages of activity based costing in comparison to traditional costing; the uses and limitations of ratio analysis; the (intended and unintended) consequences of imposing accounting conventions on the preparation of financial statements.
