Module duration

10 weeks

Assessment

100% coursework

Study location

University of Warwick main campus, Coventry

Description

Introductory description

This module provides an advanced introduction to the philosophy of Martin Heidegger, one of the most influential thinkers in 20th century (continental) philosophy.

Module aims

The principal aim of this module is to provide an advanced introduction to the work of Martin Heidegger. The course is devoted to an in-depth study of Heidegger's most important book *Being and Time* (1927). Heidegger here treats a variety of themes defining both his early and later work: while the stated aim of the book is to provide a new account of the meaning of existence or 'being', Heidegger's approach to questions of metaphysics builds on discussions of problems typically located in other areas of philosophy. Along the way to a new answer to the 'question of being', Heidegger

- develops a novel account of intentionality and intentional action;
- forcefully attacks the traditional notion of truth as correspondence;
- discusses the problem of scepticism and describes a new 'hermeneutic' epistemology;
- gives a new existentialist account of human life, centred in the idea of our 'freedom towards death';
- argues for the priority of lived time and historical understanding over abstract accounts of time as linear sequence of events.

We will proceed methodically through main sections of the text. Readings from Being and Time will be accompanied by readings from secondary literature and/or more recent (analytic) treatments of related problems.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

We will be using the Macquarrie/Robinson translation of Being and Time. Please read as much as you can ahead of term.

Learning outcomes

By the end of the module, students should be able to:

- have a sound and scholarly understanding of Heidegger's Being and Time.
- be able to understand and apply key concepts and ideas as they appear in the texts studied.
- be able to discuss important themes from Heidegger's philosophy both in seminar discussions and written work.

Indicative reading list

Martin Heidegger, Being and Time, trans. Macquarrie/Robinson .

Secondary Literature:

Wrathall's How to Read Heidegger is a good introductory work to read alongside Being and Time. The Cambridge Companion to Heidegger's Being and Time (edited by Wrathall) contains key research essays on different topics in the book. A compelling reconstruction of Heidegger's main argument with the help of more recent philosophy is found in Golob's Heidegger on Concepts, Freedom and Normativity.

Mark Wrathall, How to Read Heidegger (Granta Books: 2005).

Mark Wrathall (ed.), The Cambridge Companion to Heidegger's Being and Time (Cambridge UP: 2013).

Sacha Golob, Heidegger on Concepts, Freedom and Normativity (Cambridge UP: 2014).

Subject specific skills

Close textual reading skills.

Advanced reasoning skills.

Fluency in essay writing.

Transferable skills

Strong presentation skills, verbally and in writing.

Skills in logical and analytical reasoning.

Skills in creative thinking and critical evaluation of ideas and arguments.

Study

Study time

Type	Required
Lectures	18 sessions of 1 hour (6%)
Seminars	8 sessions of 1 hour (3%)
Private study	274 hours (91%)
Total	300 hours

Private study description

Private study and essay preparation

Costs

No further costs have been identified for this module.

Assessment

You must pass all assessment components to pass the module.

Students can register for this module without taking any assessment.

Assessment group A2

	Weighting	Study time
5000 word essay	100%	

Feedback on assessment

Students will have their essays returned with written comments. Students can share or discuss a one-page plan for each essay and will receive either verbal or written comments (as preferred).
