Politics & International Studies

**Level**

Taught Postgraduate Level

**Module leader**

Christopher Browning

**Credit value**

20

**Module duration**

10 weeks

**Assessment**

100% coursework

**Study location**

University of Warwick main campus, Coventry

---

## Description

### Introductory description

Since the end of the Cold War the security agenda of international politics has expanded dramatically. Traditional concerns with the balance of power, narrowly defined conceptions of the national interest and a focus on strategic issues of war and peace have been complemented with a much wider range of concerns also increasingly seen as fundamental for maintaining international peace and security.

This module provides an introduction to the development of security debates on a range of these so-called 'new security challenges', central to which increasingly is a shift away from narrower concerns of state security towards broader conceptions of societal security. However, the 'security-ness' of issues such as migration, climate change, resources, culture and borders, health and development, or various aspects of the global commons is often highly contested, deeply political and raise considerable ethical concerns for how security is understood and sought in the contemporary environment.

### Module aims

This module provides students with an understanding of a range of issues that are frequently

depicted as part of a new and broadening security agenda. The module emphasises security as a politically contested concept and category and encourages students to critically assess the nature of security claims being made on a range of issues – in particular to consider how security and threat are being defined, which objects of security are being prioritised, which agents are deemed most appropriate for dealing with different security challenges and which policy options are being favoured.

The module is divided into three parts. Part one provides a theoretical introduction to security. Part two focuses on tensions between state vs human security in a range of security issues. Part three focuses on security challenges raised by various contested sites of security.

## **Outline syllabus**

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Week 1: What is security?

Week 2: Migration and security

Week 3: Development and security

Week 4: Health and security

Week 5: Energy security and resource conflict

Week 6: Reading Week

Week 7: The Global Commons I: The Environment and Global Climate Change

Week 8: The Global Commons II: Outer Space, the High Seas and Antarctica

Week 9: Borders and Global Cultural Heritage

Week 10: Cyber security

## **Learning outcomes**

By the end of the module, students should be able to:

- Appreciate the politically contested nature of the concept of security.
- Identify core debates about the changing nature of security in the contemporary age, the processes that underpin them, and their potential implications.
- Interrogate those claims with a particular emphasis on their political and ethical dimensions and with respect to how debates about security are inherently politicised.
- Engage with policy debates about pertinent approaches to tackling a range of diverse security issues.
- Effectively communicate and debate arguments about the contemporary broadened international security agenda.
