

# ES2D1-15 Manufacturing Engineering Design

**25/26**

**Department**

School of Engineering

**Level**

Undergraduate Level 2

**Module leader**

Helen Neal

**Credit value**

15

**Module duration**

12 weeks

**Assessment**

100% coursework

**Study location**

University of Warwick main campus, Coventry

---

## Description

### Introductory description

ES2D1-15 Manufacturing Engineering Design

[Module web page](#)

### Module aims

This module will develop strategies to identify product requirements, identify design constraints, think creatively, solve problems, identify solutions and foster a holistic approach between design and manufacturing.

### Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

- Manufacturing design strategy
- Manufacturing design criteria

- Creative design practices
- Risk reduction
- Cost reduction through manufacture
- Design review
- Management role

## Learning outcomes

By the end of the module, students should be able to:

- Use computational tools to aid in decision making processes of design and identify which process parameters influence variation in final product characteristics. (C3, M3)
- Identify which design features really matter and how to modify a design to give it greater robustness against variation in the manufacturing process. (C12, C13, M12, M13)
- Apply risk reduction techniques at the design stages to reduce manufacturing and assembly problems. (C15, M15)
- Appreciate and apply the principles of value analysis for design for manufacture (DFM) and design for assembly (DFA) to identify opportunities for cost reduction. (C15, M15)
- Apply software simulation and programming tools in the analysis of functional components. (C13, M13)
- Function as part of a team and demonstrate understanding of the importance of personal and shared responsibility, teamwork, and communication e.g. by producing professional quality design documentation. (C16, C17, M16, M17)

## Indicative reading list

- Product Design for Manufacture and Assembly, 3rd edition 2011, Boothroyd, Dewhurst & Knight, CRC Press
- Shigley's Mechanical Engineering Design, 10th edition 2014, Budynas and Nisbett, McGraw-Hill Higher Education
- Form, structure and Mechanism, M.J.French 2012, Springer
- Engineering Design a systematic approach, Pahl, Beitz, Feldhusen and Grote, 3rd edition 2007, Springer
- Product design, Otto and Wood, 2001, Pearson

[View reading list on Talis Aspire](#)

## Subject specific skills

Plan and manage the design process, including cost drivers, evaluating outcomes, and working with technical uncertainty.

Ability to apply relevant practical and laboratory skills.

## Transferable skills

Communicate (written and oral; to technical and non-technical audiences) and work with others.

Overcome difficulties by employing skills, knowledge and understanding in a flexible manner  
Exercise initiative and personal responsibility, including time management, which may be as a team member or leader

---

## Study

### Study time

Type	Required
Lectures	5 sessions of 1 hour (3%)
Seminars	10 sessions of 2 hours (13%)
Practical classes	5 sessions of 1 hour (3%)
Supervised practical classes	4 sessions of 4 hours (11%)
Private study	104 hours (69%)
Total	150 hours

### Private study description

### 104 hrs Guided independent learning

### Costs

Category	Description	Funded by	Cost to student
Equipment and project costs	Materials for manufacturing models for group projects.	Department	£0.00

---

## Assessment

You must pass all assessment components to pass the module.

### Assessment group A4

	Weighting	Study time	Eligible for self-certification
Group Design Report 1,000 words plus portfolio - total max 30 pages, to include peer assessment	50%		No
Individual Design Proposal	50%		Yes (extension)

1,000 words plus portfolio - total max 10 pages

### **Feedback on assessment**

Written feedback on group design reports.

In session feedback of developing design.

Group feedback on performance tests.

---

## **Availability**

### **Courses**

This module is Core for:

- Year 2 of UESA-H335 BEng Automotive Engineering
- Year 2 of UESA-HN15 BEng Engineering Business Management
- Year 2 of UESA-HH75 BEng Manufacturing and Mechanical Engineering
- Year 2 of UESA-H336 MEng Automotive Engineering
- Year 2 of UESA-HH76 MEng Manufacturing and Mechanical Engineering
