Module duration

9 weeks

Assessment

25% coursework, 75% exam

Study location

University of Warwick main campus, Coventry

Description

Introductory description

Alternative investments by their very nature are applications of various disciplines. Therefore, this general practitioner (foundation) module will build on the students' knowledge from any relevant modules such as: general finance, corporate finance, investment, economics, accounting, financial analysis, asset pricing, valuation, business/management, statistics, econometrics, financial mathematics, big data, machine learning, engineering, law, etc., (none of such subjects is a specific prerequisite for this elective).

Students are strongly encouraged to make the practical link between their other subjects and the topics of this elective and how this could inform their future career or research decisions. It would enable students to recognise how they can leverage their knowledge in other disciplines to pursue and develop a career in or around investment. Below are some examples (but not exhaustive).

Economics ↔ Global Macro Hedge Fund Strategies, Strategic Asset Allocation

Corporate Finance, Corporate Governance ↔ Merger Arbitrage, Corporate Activism, Private Equity, Long-Only Active Equities

Accounting, Valuation, Equities ↔ Fundamental Equity Long/Short Hedge Funds, Private Equity, Long-Only Active Equities

Fixed Income ↔ Fixed Income Arbitrage, Distressed Securities Investing, L/O Active FI

Mathematics, Econometrics, Statistics, Big Data, Machine Learning, Coding, Engineering ↔

Quantitative Investing, Systematic Trading/Investing, Managed Futures
The same way of thinking applies to other fields of finance and investment

Module aims

Principal Module Aims (guided by the above motivating factors)

Introducing the world of Alternative Investments: Hedge Funds, Alternative Risk Premia & Smart Beta, Private Equity (including Venture Capital) and Real Assets (briefly, such as real estate, natural resources and land, infrastructure, commodities and intellectual property)

Providing practical and academic foundations and skills that are useful and relevant whether for a career with an alternative investment fund manager, investor, intermediary, or to pursue academic research in alternative investments and also beneficial for other careers

Understanding key areas of major alternative investments such as:

Main types, investment strategies and risk-return characteristics

Investment legal entity (vehicle) and compensation structures

The module's topics will introduce and support understanding related areas such as manager due diligence, selection, allocation, performance evaluation and benchmarks

The role and positioning of alternative investments in the investment world

Role and contribution to an investor's traditional asset portfolios

Strategy behaviour in different market/economic environments

Linking alternative investments and their transferable skills to the skills and knowledge of other relevant disciplines and informing students' career or research decisions in or around alternative investments as highlighted earlier

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Introduction to Alternative Investments

Hedge Funds:

- Introduction to Hedge Funds
