Description

Introductory description

This competitive module aims to complement existing subject specific public health knowledge and skills with an opportunity to undertake a real-world project in a public health setting. If selected, students spend one day a week over a flexible 12-week period working in an organisation with a health and wellbeing role on an organisation-directed project.

Module aims

This module aims to provide students with an experience of working in the Public Health (PH) environment to enhance their understanding of PH career pathways, PH policy, enhance employability skills and develop project management skills within a work-based environment which may be local or international but is usually remote-working.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Job application process and resources (CV, cover letter, interview techniques)
Identifying own strengths and areas of development
Project management
Workplace professionalism
Cultural awareness

Learning outcomes

By the end of the module, students should be able to:

- Appraise strategic priorities, objectives and roles of relevant organisations (third sector organisation (TSO) / non-governmental organisation (NGO) / statutory organization) and how they interface with other agencies within the Public Health domain
- Plan, conduct and reflect on a project in a work-based environment
- Develop a range of transferable skills including communication, networking, independent research and self-evaluation, interpersonal and teamwork skills

Interdisciplinary

Most of the placements are real-world situations within health-related organisations where students are working within multidisciplinary teams and having to be aware of and work across disciplines for their placement tasks

International

Many of the placements are outside of the UK/region - although remote-working, students are exposed to the challenges of working remotely and within an international culture within the workplace.

Subject specific skills

Appraise strategic priorities, objectives, and roles of relevant organisations (third sector organisation (TSO) / non-governmental organisation (NGO) / statutory organization) and how they interface with other agencies within the Public Health domain
Plan, conduct and reflect on a public health project in a work-based environment

Transferable skills

Organisation and time management, Use of tools, technology and software, commercial awareness, Thinking and problem-solving, Teamwork, Written communication, Oral communication, Adaptability and flexibility, Independence and initiative,
