

PS122-15 Psychology in Context

26/27

Department

Psychology

Level

Undergraduate Level 1

Module leader

Alice Chan

Credit value

15

Module duration

12 weeks

Assessment

15% coursework, 85% exam

Study location

University of Warwick main campus, Coventry

Description

Introductory description

This module will introduce the history of psychology and core topics in developmental and cognitive psychology.

Module aims

Previous knowledge of psychology will not be assumed. The module covers key areas of psychology, developing basic knowledge in each. Taken together, PS121 Brain and Behaviour, PS120 Neuropsychology & Psychopathology and PS122 Psychology in Context provide a general introduction to Psychology designed to support work in the second and third years of the Psychology Honours Degrees.

Outline syllabus

This is an indicative module outline only to give an indication of the sort of topics that may be covered. Actual sessions held may differ.

Psychology in Context is part of a general introduction to Psychology designed as a foundation for further learning in the second and third years of the Psychology Honours Degrees. The module covers three different subjects representing a sample of research and theoretical topics in

psychology: (1) History of Psychology; (2) Developmental Psychology; (3) and Psychology of Learning.

Learning outcomes

By the end of the module, students should be able to:

- be familiar with and able to discuss some of the classic studies in the areas of psychology set out above;
- have a critical appreciation of some of the main concepts and theories in each of the areas;
- locate modern psychology in a wider intellectual and historical context;
- understand the parts played by developmental psychology in psychology as a whole;
- understand the parts played by cognitive psychology in psychology as a whole; and
- be able to take a historical perspective on psychology as a science.

Indicative reading list

[Reading lists can be found in Talis](#)
